**ENC Focus ,2000      *Teaching Is a Privilege* Elizabeth C. Manvell,2009-11-16** New teachers have a high attrition rate often due to concerns about classroom discipline interactions with parents meeting the diverse needs of students and pressures of high academic standards *Teaching Is a Privilege* offers beginning teachers twelve essential understandings necessary to meet these challenges and thrive in the classroom The understandings are based on a core belief that teaching is a privilege worthy of continuous thoughtful self reflection and compassionate treatment of children and their families The result is higher teacher morale and higher achieving students The book focuses on development of the relationship side of teaching attitudes perceptions beliefs and behaviors which builds trust and translates into a positive classroom climate The intention is to inspire new teachers to begin their professional lives with an informed optimistic belief system that deepens their understanding of what is possible and then to provide them with ways to get there The twelve essential understandings serve as the foundation of their teaching practices and ultimately lead to happy high achieving respectful students and an exemplary personally satisfying teaching career      *Research on Teacher Stress* Christopher J. McCarthy,Richard G. Lambert,2023-03-01 This volume informs our understanding of how educational settings can respond to the challenges of the COVID 19 pandemic and beyond Teaching has always been a challenging profession but the pandemic has added unprecedented levels of demands Much of what we know about stress and trauma in education predates the COVID 19 pandemic As the pandemic recedes it seems likely that recruiting and retaining teachers always a challenge will become even more difficult This could not be worse for students who face steep losses in their academic and socio emotional progress after more than two years of pandemic impacted schooling The silver lining is that scholars who study the occupational health have spent the past several years studying the effect of the pandemic on teachers which led us to edit this volume to collect what is known and have these experts explain how we can better support teachers in the future This book documents the many impacts of the pandemic on the teaching profession but also leverages research to chart a path forward Part I examines the contours of stress with a particular emphasis on COVID 19 impacts These contributions range from

parents achievement worries to compassion fatigue and more optimistically how teachers cope Part II examines pandemic impacts on pre school teachers in both the U S and in Australia Given the social distancing in place during the pandemic pre school students and their teachers were under unique demands as there is no substitute for the personal connection critical at that age It is likely that students entering elementary school in the next few years will have work to do in their social skills Part III focuses on mentoring and stress during the pandemic Mentoring is an important part of teacher s professional development but the pandemic scrambled traditional forms of mentoring as all teachers were thrown into unfamiliar online technology The final section of this book Part IV includes links between teacher stress and trauma during the pandemic Clearly with the ongoing nature of the pandemic it is easy to see how trauma is likely to manifest in years to come Readers of this book will better understand teacher demands as well as the resources teachers will need going forward Teachers made heroic efforts during the pandemic to help their students both academically and personally We owe to them to learn from research during the pandemic that points to the way to a healthier occupational future
