## DEFINITION

## EXAMPLES

Examples of reflective teaching include:

- Observing other teachers and comparing their practice to your own.
- Taking notes on your own teaching practice and thinking about ways to improve.
- Asking for feedback from your students to achieve self-improvement.

Cress,Peter J. Collier,Vicki L. Reitenauer,2023-07-03 This substantially expanded new edition

of this widely used and acclaimed text maintains the objectives and tenets of the first. It is designed to help students understand and reflect on their community service experiences both as individuals and as citizens of communities in need of their compassionate expertise. It is designed to assist faculty in facilitating student development of compassionate expertise through the context of service in applying disciplinary knowledge to community issues and challenges. In sum, the book is about how to make academic sense of civic service in preparing for roles as future citizen leaders. Each chapter has been developed to be read and reviewed in sequence over the term of a service learning course. Students in a semester course might read just one chapter each week while those in a quarter term course might need to read one to two chapters per week. The chapters are intentionally short, averaging 8 to 14 pages, so they do not interfere with other course content reading. This edition presents four new chapters on Mentoring, Leadership, Becoming a Change Agent, and Short Term Immersive and Global Service Learning experiences. The authors have also revised the original chapters to more fully address issues of social justice, privilege, power, diversity, intercultural communication, and technology. It has added more disciplinary examples, incorporated additional academic content for understanding service learning issues (e.g., attribution theory), and covers issues related to students with disabilities and international students. This text is a student-friendly, self-directed guide to service learning that develops the skills needed to succeed. Clearly links service learning to the learning goals of the course. Combines self-study and peer study/workbook formats with activities that can be incorporated in class to give teachers maximum flexibility in structuring their service learning courses. Promotes independent and collaborative learning. Equally suitable for courses of a few weeks or a few months duration. Shows students how to assess progress and communicate end results. Written for students participating in service learning as a class but also suitable for students working individually on a project.

**The Role of Reflection in Managerial Learning** Marilyn W. Daudelin,Kent W. Seibert,1999-09-30 Challenging work experiences are the richest source of learning for today s managers Yet lessons embedded in these experiences are not always obvious This comprehensive book describes a critical yet under researched element of how managers learn from these experiences reflection Today s workplace demands continual learning which in turn requires reflection While this book supports the prevailing view that reflection is central to experiential learning it challenges the traditional views that it is the same as contemplation that it is incompatible with management and that it is time consuming and unnatural for managers Original quantitative and qualitative research reported in this book indicates that two different yet complementary modes of managerial reflection exist active and proactive Active reflection is something that managers naturally engage in during challenging job experiences whereas managers must be prompted to engage in proactive reflection Both modes involve processes of intentional inquiry Different forces are necessary to stimulate each type of reflection Based on these findings the claim is made that the potential to learn from experience is greatest when managers intentionally engage in both modes Accordingly a holistic model that integrates active and proactive reflection is presented This model has important implications for theorists and researchers of managerial learning by identifying previously unreported aspects of reflection It is also relevant to practitioners and companies who desire to enhance what their managers learn from their workplace experience
