National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on a Study of Food Safety and Other Consequences of Publishing Establishment-Specific Data, 2012-01-14 The Food Safety and Inspection Service FSIS is the regulatory agency in the US Department of Agriculture that is responsible for ensuring that meat poultry and processed egg products produced domestically or imported into the United States are safe wholesome and properly labeled FSIS collects a voluminous amount of data in support of its regulatory functions but the two major types of FSIS data that are currently being considered for public release are sampling and testing data derived from standard laboratory tests and inspection and enforcement data derived from text written by inspectors Some of those data are already released to the public in aggregated form but not in disaggregated establishment specific form In recent years the Obama administration has implemented measures to facilitate openness in government including the requirement that federal agencies publish information online and provide public access to information in a timely manner in a form that can be easily retrieved downloaded indexed and searched with tools that are available on the Internet and without the need for Freedom of Information Act FOIA requests The Potential Consequences of Public Release of Food Safety and Inspection Service Establishment Specific Data examines the potential food safety benefits and other consequences of making establishment specific data publicly available on the Internet The report includes how factors such as level of aggregation timing of release level of completeness and characterization of the data or context in which the data are presented might affect their utility in improving food safety The report also examines potential ways that food safety benefits and other effects of publicly posting the data might be measured

**Integrating Biological Control into Conservation Practice** Roy van Driesche, Daniel Simberloff, Bernd Blossey, Charlotte Causton, Mark Hoddle, Christian O. Marks, Kevin M. Heinz, David L. Wagner, Keith D. Warner, 2016-08-01 Invasive species have a critical and growing effect upon natural areas They can modify degrade or destroy wildland ecosystem structure and function and reduce native biodiversity Landscape level solutions are needed to address these problems Conservation biologists seek to limit such damage and restore ecosystems using a variety of

approaches One such approach is biological control the deliberate importation and establishment of specialized natural enemies which can address invasive species problems and which should be considered as a possible component of restoration Biological control can be an effective tool against many invasive insects and plants but it has rarely been successfully employed against other groups Safety is of paramount concern and requires that the natural enemies used be specialized and that targeted pests be drivers of ecological degradation While modern approaches allow species to be selected with a high level of security some risks do remain However as in all species introductions these should be viewed in the context of the risk of failing to reduce the impact of the invasive species This unique book identifies the balance among these factors to show how biological control can be integrated into ecosystem restoration as practiced by conservation biologists Jointly developed by conservation biologists and biological control scientists it contains chapters on matching tools to management goals tools in action measuring and evaluating ecological outcomes of biological control introductions managing conflict over biological control and includes case studies as well as an ethical framework for integrating biological control and conservation practice Integrating Biological Control into Conservation Practice is suitable for graduate courses in invasive species management and biological control as well as for research scientists in government and non profit conservation organizations
