*The Interruption of Heteronormativity in Higher Education* Michael Seal, 2019-07-29. This book examines how heteronormativity in higher education can be interrupted and resisted. Located within the theoretical framework of queer and critical pedagogy and based on extensive empirical research, the author explores the dynamics of heteronormativity and its interruption on professional courses in a range of higher education institutions. Reactions to attempt to interrupt it were nuanced while strategies of contested engagement, avoidance and retreat were expressed. Heterosexualities were largely unexamined and unarticulated. Coming out needs to be a pedagogical act carried out concurrently with the interruptions of other social constructions and binary oppositions. The author calls for co-created and co-held meta-reflexive and liminal spaces that emphasise intersubjectivity, encounters and working in the moment. These spaces must deconstruct and reconstruct pedagogical power and knowledge to promote collective intersubjective consciousnesses and widen the vision of the reflective practitioner to that of the pedagogical practitioner. This pioneering book is a call to action to all those concerned with interrupting and problematising presumed binary categories of sexuality within the heterosexual matrix.

*Action Research for Nurses* Peter McDonnell, Jean McNiff, 2015-11-09. Nurses work in complex situations with daily challenges where the needs of each patient represent unique demands. Action research helps nurses to investigate their practices as reflective practitioners, allowing them to ask: What is going on? How do we understand the existing situation? How do we improve it? This book supports nurses in investigating their own professional practices in order to develop new insights and approaches embodying holistic perspectives in dialogical and relational forms of individual and organisational learning, equal emphasis on processes and outcomes, welcoming all participants' contributions and listening to all voices, developing a patient-centred focus where people are involved in their own healing, building communities of enquiring practices. This book is intended for undergraduate student nurses, qualified practising nurses in clinical settings who may or may not be engaged in formal professional education courses and nurse educators and managers.
