Stochastic Dynamic Response Analysis and Performance-Based Seismic Safety Evaluation for High Concrete Faced Rockfill Dams Bin Xu, Rui Pang, 2024-09-17 This open access book provides a complete probabilistic analysis method and a performance based seismic safety evaluation for high concrete faced rockfill dam CFRD Combined with random sample generation and reliability analysis methods the dynamic response characteristics and reliability level of CFRD under various random factors are comprehensively described In Chapter 2 a random ground motion model based on spectral representation random function and a high dimensional random variable generation method based on GF discrepancy are established Combined with probability density evolution method PDEM and the random sample generation methods to verify its effectiveness and reliability for nonlinear complex geotechnical engineering In Chapter 3 the dynamic response and probabilistic characteristics of high CFRD under random ground motion are revealed based on the elastoplastic analysis A performance based seismic safety evaluation method is established In Chapter 4 the influence of material parameter randomness on dynamic response and seismic safety of high CFRD is studied from the perspective of stochastic dynamics and probability In Chapter 5 the stochastic dynamic response and probability distribution of high CFRD under the coupled random action of ground motion and material parameters are systematically studied and the performance based seismic safety evaluation framework is improved In Chapter 6 The stochastic dynamic response of 3D high CFRD is studied and the failure performance index and performance level based on overstress volume ratio combined with overstress accumulation time are discussed The performance based seismic safety evaluation framework is further improved In Chapter 7 combined with the finite element dynamic time history analysis method considering the softening effect of rockfill a performance based seismic safety evaluation framework for dam slope stability of high CFRD under multiple random factors is systematically explored

from the perspective of stochastic dynamics and probability In Chapter 8 The performance indexes of seismic safety evaluation for high CFRDs are suggested and the corresponding performance level with probability assurance is put forward The multi seismic intensity multi performance target failure probability performance relationship is established and a performance based seismic safety evaluation framework is initially formed This book can be used as a reference for scholars studying random vibration and reliability analysis as well as for scholars studying dam safety evaluation
