**Behavior Science** H. W. Reese, L. J. Parrott, 2014-02-24 First published in 1986 This volume presents a selection of advances in the field of behaviour science in psychology It can be used as a pick up guide with chapters arranged into three kinds of advances theoretical or philosophical empirical and methodological The preface includes a summary of each of the chapters which range from the role of theory in the behaviour analysis of private events to the use of residential laboratories with programmed environments for the study of behaviours The New Behaviorism John Staddon, 2014-03-05 This groundbreaking book presents a brief history of behaviorism the dominant movement in American psychology in the first half of the 20th Century It then analyzes and criticizes radical behaviorism as pioneered by B F Skinner and its philosophy and applications to social issues This second edition is a completely rewritten and much expanded version of the first edition published nearly 15 years earlier It surveys what changes have occurred within behaviorism and whether it has maintained its influence on experimental cognitive psychology or other fields The mission of the book is to help steer experimental psychology away from its current undisciplined indulgence in mental life toward the core of science which is an economical description of nature The author argues that parsimony the elementary philosophical distinction between private and public events even biology evolution and animal psychology all are ignored by much contemporary cognitive psychology The failings of radical behaviorism as well as a philosophically defective cognitive psychology point to the need for a new theoretical behaviorism which can deal with problems such as consciousness that have been either ignored evaded or muddled by existing approaches This new behaviorism provides a unified framework for the science of behavior that can be applied both to the laboratory and to broader practical issues such as law and punishment the health care system and teaching
