Chemical Engineering Education, 1999 **Optimization and Logistics Challenges in the Enterprise** Wanpracha Chaovalitwongse, Kevin C. Furman, Panos M. Pardalos, 2009-06-17 In a world with highly competitive markets and economic instability due to capitalization industrial competition has increasingly intensified In order for many industries to survive and succeed they need to develop highly effective coordination between supply chain partners dynamic collaborative and strategic alliance relationships and efficient logistics and supply chain network designs Consequently in the past decade there has been an explosion of interest among academic researchers and industrial practitioners in innovative supply chain and logistics models algorithms and coordination policies Mathematically distinct from classical supply chain management this emerging research area has been proven to be useful and applicable to a wide variety of industries This book brings together recent advances in supply chain and logistics research and computational optimization that apply to a collaborative environment in the enterprise

C.A.C.E. '79, 1979 **Material And Energy Balances For Engineers And Environmentalists** Colin William Oloman, 2009-05-21 Material and energy balances are fundamental to many engineering disciplines and have a major role in decisions related to sustainable development This text which covers the substance of corresponding undergraduate courses presents the balance concepts and calculations in a format accessible to students engineering professionals and others who are concerned with the material and energy future of our society Following a review of the basic science and economics the text focuses on material and energy accounting in batch and continuous operations with emphasis on generic process units flow sheets stream tables and spreadsheet calculations There is a unified approach to reactive and non reactive energy

balance calculations plus chapters dedicated to the general balance equation and simultaneous material and energy balances. Seventy worked examples show the elements of process balances and connect them with the material and energy concerns of the 21st century. *Food Properties and Computer-Aided Engineering of Food Processing Systems* R.P. Singh, Augusto G. Medina, 2012-12-06. Food properties, whether they concern the physical, thermodynamic, chemical, nutritional, or sensory characteristics of foods, play an important role in food processing. In our quest to gain a mechanistic understanding of changes occurring during food processing, the knowledge of food properties is essential. Quantitative information on the food properties is necessary in the design and operation of food processing equipment. Foods, because of their biological nature and variability, vary in the magnitude of their properties. The variation in properties offers a challenge both in their measurement and use in the food processing applications. Often a high level of precision in measurement of properties is not possible as the measurement method may itself cause changes to the product, resulting in a variation in the obtained values. Recognizing the difficulties in measurement of food properties and the lack of completeness of such information, several research programs have been in existence during the last two decades. In Europe, a multinational effort has been underway since 1978. The first project supported by COST European Cooperation in the Field of Scientific and Technical Research was titled COST 90: The Effect of Processing on the Physical Properties of Foodstuffs. This and another project, COST 90bis, have considerably added to our knowledge of measurement methods and data on a number of physical properties. Two publications that summarize the work conducted under 1, 2, these projects are *Physical Properties of Foods* and *Physical Properties of Foods: Progress in Engineering Optimization-1981* Roger Mayne, K. M. Ragsdell, 1981. **34th European Symposium on Computer Aided Process Engineering / 15th International Symposium on Process Systems Engineering** Flavio Manenti, G.V. Rex Reklaitis, 2024-06-27. The 34th European Symposium on Computer Aided Process Engineering / 15th International Symposium on Process Systems Engineering contains the papers presented at the 34th European Symposium on Computer Aided Process Engineering / 15th International Symposium on Process Systems Engineering joint event. It is a valuable resource for chemical engineers, chemical process engineers, researchers in industry and academia, students and consultants for chemical industries. Presents findings and discussions from the 34th European Symposium on Computer Aided Process Engineering / 15th International Symposium on Process Systems Engineering joint event. *Combined Scheduling and Control* John D. Hedengren, Logan Beal, 2018-04-13. This book is a printed edition of the Special Issue *Combined Scheduling and Control* that was published in *Processes*. **Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems** Jean-Charles Régin, Michel Rueher, 2004-04-07. This book constitutes the refereed proceedings of the First International Conference on Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems (CPAIOR 2004) held in Nice, France, in April 2004.
