

## Laboratory Activity #1 — Student Laboratory Packet

**Relationships and Biodiversity***A Laboratory Activity for the Living Environment***Introduction**

*Botana curus* is a valuable plant because it produces Curol, a compound used for treating certain kinds of cancer. Curol cannot be produced in the laboratory. *Botana curus* grows very slowly and is on the endangered species list, so its ability to provide Curol in large quantities is limited.

Species that are more closely related to *Botana curus* are more likely to produce the important substance Curol. Three similar plant species that are plentiful (X, Y, and Z) may be related to *Botana curus*. You will work as a researcher to:

- gather structural and molecular evidence to determine which plant species is most closely related to the hypothetical species, *Botana curus*
- use this evidence to decide which plant species is most likely to serve as a source of the important substance Curol

**Safety**

- You will need to wear goggles while conducting Tests 4 and 5.
- Do not eat or drink anything in the laboratory while doing this laboratory activity.

**Important Note:** Record all of your data and answers on these laboratory sheets. You will need to keep them for review before the Regents Examination. Later, you will need to transfer your answers to a separate Student Answer Packet. Your teacher will use the packet in grading your work, and the school will retain it as evidence of your completion of the laboratory requirement for the Living Environment Regents Examination.

**Structural Evidence for Relationships**

Perform the following tests and record your observations in Table 1 on page 8 of this packet. Use a hand lens or microscope as needed.

**Test 1—Structural Characteristics of Plants**

- Do not remove the plant samples from the plastic bags/cards.
- Compare the structural characteristics of the plant samples. Record your observations in Table 1 (see page 8).

**Test 2—Structural Characteristics of Seeds**

- Do not remove the seed samples from the plastic bags/cards.
- Compare the structural characteristics of the seed samples. Record your observations in Table 1.

**Making Connections in Elementary and Middle School Social Studies** Andrew P. Johnson, 2009-10-15 Making Connections in Elementary and Middle School Social Studies Second Edition is the best text for teaching primary school teachers how to integrate social studies into other content areas This book is a comprehensive reader friendly text that demonstrates how personal connections can be incorporated into social studies education while meeting the National Council for the Social Studies' thematic pedagogical and disciplinary standards Praised for its wealth of strategies that go beyond social studies teaching including classroom strategies pedagogical techniques activities and lesson plan ideas this book examines a variety of methods both novice and experienced teachers alike can use to integrate social studies into other content areas

**Argument-driven Inquiry in Biology** Victor Sampson, 2014-04-01 Are you interested in using argument driven inquiry for high school lab instruction but just aren't sure how to do it You aren't alone This book will provide you with both the information and instructional materials you need to start using this method right away Argument Driven Inquiry in Biology is a one stop source of expertise advice and investigations The book is broken into two basic parts 1 An introduction to the stages of argument driven inquiry from question identification data analysis and argument development and evaluation to double blind peer review and report revision 2 A well organized series of 27 field tested labs that cover molecules and organisms ecosystems heredity and biological evolution The investigations are designed to be more authentic scientific experiences than traditional laboratory activities They give your students an opportunity to design their own methods develop models collect and analyze data generate arguments and critique claims and evidence Because the authors are veteran teachers they designed Argument Driven Inquiry in Biology to be easy to use and aligned with today's standards The labs include reproducible student pages and teacher notes The investigations will help your students learn the core ideas crosscutting concepts and scientific practices found in the Next Generation Science Standards In addition they offer ways for students to develop the disciplinary skills outlined in the Common Core State Standards Many of today's teachers like you want to find new ways to engage students in scientific practices and help students learn more from lab activities Argument Driven Inquiry in Biology does all of this even as it gives students the chance to practice reading writing speaking and using math in the context of science

**The Carbon Fix** Stephanie Paladino, Shirley J Fiske, 2016-11-18 Given the growing urgency to develop global responses to a changing climate The Carbon Fix examines the social and equity dimensions of putting the world's forests and necessarily the rural people who manage and depend on them at the center of climate policy efforts such as REDD intended to slow global warming The book assesses the implications of international policy approaches that focus on forests as carbon and especially forest carbon offsets for rights justice and climate governance Contributions from leading anthropologists and geographers analyze a growing trend towards market principles and financialization of nature in environmental governance placing it into conceptual critical and historical context The book then challenges

perceptions of forest carbon initiatives through in depth field based case studies assessing projects policies and procedures at various scales from informed consent to international carbon auditing While providing a mixed assessment of the potential for forest carbon initiatives to balance carbon with social goals the authors present compelling evidence for the complexities of the carbon offset enterprise fraught with competing interests and interpretations at multiple scales and having unanticipated and often deleterious effects on the resources and rights of the world s poorest peoples especially indigenous and rural peoples The Carbon Fix provides nuanced insights into political economic and ethical issues associated with climate change policy Its case approach and fresh perspective are critical to environmental professionals development planners and project managers and to students in upper level undergraduate and graduate courses in environmental anthropology and geography environmental and policy studies international development and indigenous studies **Journal of the**
