Tomlinson, 2018-12-14 I discovered very quickly that the Pentax 645 was much easier to use than the Hasselblad 500c I got more photos per roll too even though they were smaller than the 6 by 6cm of the 500c They were 6 by 4.5cm which is where the 645 comes from in the name One thing I did notice was the clarity and sharpness of that prime lens To my eyes it was just as good if not a tiny bit better than the renowned Carl Zeiss Planar 80mm f 2.8 prime lens I started shooting with the Pentax 645 a lot because unlike the 500c and the two Mamiyas it isn't a pain to use It acts a lot like a 35mm SLR or even

a DSLR much more so than my three other medium format cameras This book can help to get you started using the Pentax 645     *Medium-Format Photography I: Pentax 645* Shawn M. Tomlinson,2018-02-22 Film cameras the bodies themselves have little to do with image quality Lenses are far more important to image quality than camera bodies So as long as your camera has accurate shutter speeds aperture settings and metering the brand you pick doesn t really have much of an effect upon the final image So then it appears the model camera you choose is irrelevant Well no The type of film SLR camera you choose is most important to you as the photographer in features and convenience Comfort has a lot to do with how good you are as a photographer What I mean by that is that you choose a camera that feels comfortable in your hands and becomes an extension of your brain as a photographer This makes it easier to capture the types of images you want
