The Material of World History Tina Mai Chen, David S. Churchill, 2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes **Pacific Dream?**

Cultural Development Ben Garner,2016-04-28 There is a growing recognition of the role that culture can play in sustainable development strategies This development has generally been welcomed but also raises a number of questions What are the implications in policy and practice Who are the most influential voices in promoting a global agenda for culture and development and to what extent has the creation of new international policy instruments reflected a consensus More fundamentally what is meant by culture in these discussions and who has the power to give particular definitions political and legal authority The Politics of Cultural Development seeks to provide a theoretically and historically informed response to such questions illustrated by reference to case studies including the European Union the Caribbean and China Particular attention is paid to the formation of the UNESCO Convention on the Protection and the Promotion of the Diversity of Cultural Expressions a landmark instrument in debates about culture and development The book goes on to explore some of the practical implications that this international treaty is beginning to have for the ways that culture is and is not being

integrated into contemporary development policy and practice This book will be useful for students academics and policymakers in the fields of international development international relations international political economy cultural policy and cultural theory Culture Storm: Politics & the Ritual Order Harold L. Nieburg,1973 **Managing Nongovernmental Organizations** Frederik Claeyé,2014-03-26 The idea that international development aid needs to be better managed and coordinated gained currency in the early 1990s The increasing emphasis on management has resulted in the present vogue of managing for development results as one of the central tenets in the discourse on international aid But how appropriate are these ideas tools and techniques for non governmental development organizations NGOs and how much does geographic context matter Examining the current debate on aid effectiveness and the role of NGOs in contributing to it this book highlights the critical importance of understanding how the global and the local interact to increase aid efficacy and develop more culturally astute ways of managing NGOs With a focus on NGOs active in sub Saharan Africa as case studies author Frederik Claey demonstrates that NGOs are not mere passive recipients of management knowledge and practices emanating from the global governance structure of international aid but actively engage with these ideas and practices to translate and rework them through a local cultural lens This process results in the emergence of unique hybrid management systems that combine the pressure to become more business like with the mission to satisfy the demands of the communities they serve The Ottoman Empire and the World-Economy Huri Islamoglu-Inan,2004-06-07 New perspectives on the Ottoman Empire challenging Western stereotypes *Anti-Racist Leadership* James D. that serve as a means of making sense of our own world. Such creative and interactive activity is arguably patently religious. This book examines the nature of sacred space in virtual contexts, technology as a vehicle for sacred texts, who we are when we go online, what rituals have in common with games and how they work online, what happens to community when people worship online, how religious worlds and virtual worlds nurture similar desires. Rachel Wagner suggests that whilst our engagement with virtual reality can be viewed as a form of religious activity, today's virtual religion marks a radical departure from traditional religious practice: it is ephemeral, transient, rapid, disposable, hyper-individualized, hybrid and in an ongoing state of flux.

Understanding European Integration R. Pavananthi Vembulu, 2003. In the background of new questions of identity, culture and community emerged after the Maastricht Treaty, this book explores the European integration process since it throws immanent challenge to the existing theoretical paradigms such as nationalism and globalization. Drawing influence from this intellectual climate, this book tries to understand the integration process within the cultural history of Europe. The study structured itself along three axes. First, it circled down on the problematic over defining what Europe means. Here the efforts were on to highlight the constant flux and contingent nature of the definition of Europe. Second, how this contingent nature of Europe has compelled the European Union to no longer skirt away the question of identity if it is to consolidate the process and expand its boundary towards East by focusing upon the cultural policy of the Union. The study brought forth the various efforts of the Union, particularly the European Commission, to transform the loyalties and identities of people from the national crucible to a broader European spectrum. Thirdly, the study critically evaluates these policy initiatives and highlights how they are structured around the nineteenth-century colonial discourse of Europe.
