

### TRAINING PLAN

#### *Overview*

*The Training Plan outlines the objectives, needs, strategy, and curriculum to be addressed when training users on the new or enhanced information system. The plan presents the activities needed to support the development of training materials, coordination of training schedules, reservation of personnel and facilities, planning for training needs, and other training-related tasks. Training activities are developed to teach user personnel the use of the system as specified in the training criteria. To develop a Training Plan, refer to the outline.*

*Include the target audiences and topics on which training must be conducted on the list of training needs. Include in the training strategy how the topics will be addressed. This information includes the format of the training program, the list of topics to be covered, materials, time, space requirements, and proposed schedules. Discuss QA in terms of testing, course evaluation, feedback, and course modification/enhancement.*

#### **1 INTRODUCTION**

This section provides a management summary of the entire plan. It is not required to provide information in this section if the descriptions provided in the subsequent sections are sufficient.

##### **1.1 Background and Scope**

This section provides a brief description of the project from a management perspective. It identifies the system, its purpose, and its intended users. This section also provides a high-level summary of the Training Plan and its scope.

##### **1.2 Points of Contact**

This section provides the organization name (code) and title of key points of contact for system development. It includes such points of contact as the Project Manager, Program Manager, QA Manager, Security Manager, Training Coordinator, and Training representative, as appropriate.

##### **1.3 Document Organization**

The organization of the Training Plan is described in this section.

##### **1.4 Project References**

This section provides a bibliography of key project references and deliverables that have been produced before this point. For example, these references might include the Project Plan, FRD, Test Plan, Implementation Plan, Conversion Plan, and Systems Design Documents.

##### **1.5 Security**

If applicable, this section provides a brief discussion of the system's security controls and the need for security and protection of sensitive State data. If the system handles sensitive information, information should be included about labeling system outputs as sensitive.

**Reading Sounds** Sean Zdenek,2015-12-23 Imagine a common movie scene a hero confronts a villain Captioning such a moment would at first glance seem as basic as transcribing the dialogue But consider the choices involved How do you convey the sarcasm in a comeback Do you include a henchman s muttering in the background Does the villain emit a scream a grunt or a howl as he goes down And how do you note a gunshot without spoiling the scene These are the choices closed captioners face every day Captioners must decide whether and how to describe background noises accents laughter musical cues and even silences When captioners describe a sound or choose to ignore it they are applying their own subjective interpretations to otherwise objective noises creating meaning that does not necessarily exist in the soundtrack or the script Reading Sounds looks at closed captioning as a potent source of meaning in rhetorical analysis Through nine engrossing chapters Sean Zdenek demonstrates how the choices captioners make affect the way deaf and hard of hearing viewers experience media He draws on hundreds of real life examples as well as interviews with both professional captioners and regular viewers of closed captioning Zdenek s analysis is an engrossing look at how we make the audible visible one that proves that better standards for closed captioning create a better entertainment experience for all viewers
