performance This research compared training digital skills to entry level enlisted soldiers by the conventional method to training by a constructivist method The constructivist method actively engages soldiers by using realistic vignettes as training tools to acquire and integrate knowledge of the digital system and the military Job After seven days of training soldiers trained by both methods were asked to complete 1 a practical exercise requiring application of their training in an unfamiliar vignette and 2 the current schoolhouse exam No difference was found between the conventional training methods and the constructivist method on the current schoolhouse exam Soldiers trained using the constructivist method were more successful In applying their training to solve unfamiliar problems and reported lower levels of workload The constructivist training method was shown to improve soldiers adaptation and application of their training to unfamiliar situations DTIC
