in balance level 8, down and through eyelet 10 on the face cover, through needle bar thread guide 10, and from left to right through needle eye 11.

**Basic Rule:** On all sewing machines, the needle is threaded in "long groove-short groove" direction, and inserted with its short groove facing toward the shuttle.

### 5. Drawing Up the Bobbin Thread

1. Hold the end of the needle thread.
2. Turn the balance wheel toward you until the bobbin thread comes up through the needle hole in a loop (Fig. 4).
3. Lay both threads back under the presser foot (Fig. 10).

3. Place spool 1 on the transverse spool pin.
4. Pass the thread from spool 1 through eyelet 2, around and between tension discs 3, and lay it matched and on the bobbin.
5. Engage the bobbin winder by depressing lever 5. When treadling, the end of the thread will easily wind on the bobbin. The bobbin winder will stop automatically when the bobbin is filled.

Fig. 2

Do not wind the first time. Fill the bobbin by hand on the winder. Raise the foot if the thread is placed on the spool in the wrong way. After the thread is wound, then sewing.

**Building Interactive Systems** Philip Gray, Roger Took, 2013-03-09 Architectures and tools are two important considerations in the construction of interactive computer systems The former is concerned with the optimal

structural organisation of systems and the latter with the effective support of the design and management of user interfaces. They are regarded as the areas of research most likely to contribute to the development of existing interactive systems in particular by providing improved architectures capable of supporting new styles of interaction and more sophisticated software tools to improve productivity. This volume combines the proceedings of two workshops held in York and Glasgow which concentrated on architectures and tools respectively. In doing so it addresses the problems of user interface construction from two complementary viewpoints and provides alternative perspectives on many of the central issues. Some of the papers are published in expanded form to provide a more comprehensive coverage of the topics and two additional papers have been included which offer a useful insight into issues raised by the workshops. The papers address formal and theoretical concerns as well as academic and commercial ones. Specific topics covered include novel input models, architectures for real time systems and object oriented user interface tools for X widgets, NeWS and Smalltalk based applications. The papers also include presentations of new tools and architectural designs. *Building Interactive Systems: Architectures and Tools* provides the most extensive recent account of research into the relationship between architectures and tools in the construction of interactive computer systems and will be of interest to researchers, postgraduate students and software developers. *Parachute Rigger Handbook (Change 1) FAA-H-8083-17A* Federal Aviation

Administration, 2018-09-15. The handbook contains information on regulations and human factors design and construction materials, operations, inspection and packing, hand tools, sewing machines, the parachute, loft repairs, alterations and manufacture. This handbook conforms to training and certification concepts established by the Federal Aviation Administration, FAA. There are different ways of teaching as well as performing specific rigging procedures and many variations in the explanations of repairs, alterations and manufacture of parachutes. The discussion and explanations reflect commonly used practices and principles. This handbook provides a basic knowledge that can serve as a foundation on which to build further knowledge. Occasionally the word must or similar language is used where the desired action is deemed critical. The use of such language is not intended to add to or interpret. **McCall's**, 1954. 50 Ways to Master Your Sewing Machine Linda Denner, 1996. Today's sewing machines allow even novice sewers to embroider and produce garments of professional quality. Computerization provides the accuracy and repeatability that was previously achieved only through years of experience. But most sewers do not employ the full capabilities of their machines. *50 Ways to Master Your Sewing Machine* will change that. It picks up where the often inadequate owner's manuals leave off and guides sewers in exploring the time saving and creative potential of their machines. *Housecraft*, 1979. *Threads Magazine*, 2002. **Maine State Year-book, and Legislative Manual, for the Year ...**, 1882. **Handbook of Buying Issue**, 1971.
