Give Your Reel Proper Care

This reel is a fine precision mechanism. A little attention in keeping it clean and properly lubricated will be repaid by long and dependable service.

THIS REEL SHOULD BE OILED BEFORE USING

While every reel is well oiled at the time it is made, the best of oils evaporate under certain conditions. Pflueger Speede Reel oil is recommended. It is especially compounded for this purpose. Single oiling instructions — to oil spool pivots it is not necessary to remove either oil cup. Merely turn oil cup cover until hole shows and put in a drop of oil. Then close opening. Put a drop through crank nut hole for the cog post on which the gear revolves. Place a few drops of oil on both ends of double thread shaft. This part should be oiled every few hours while the reel is in active use. Oil the reel as above at least once a day. An occasional drop of oil on each handle is advisable.

It should not be necessary to disassemble this reel for greasing more frequently than once or twice a season, unless it has become full of dirt. When it is necessary the breakdown view of the parts shows their relative positions for disassembly and assembly.

After cleaning all parts, preferably with benzene or carbon tetrachloride, place a drop of oil in pivot bearing in back plate, a little grease on the click tongue, and assemble reel. After the gear and pinions are in place, put a small amount of grease on the gear (do not use too much at one time — only enough to cover the gear teeth). Pflueger Runfree Gear Grease, especially prepared for that purpose, is the best gear lubricant to use. Oil the cog post and place a drop of oil in the front pivot bearing before replacing cap of reel. Oil the double thread shaft as previously instructed. Do not use gear grease on this part.

Service

Pflueger Repair Parts are available at most leading sporting goods and tackle stores. If you cannot find a dealer handling the parts, they may be purchased directly from the factory. It is recommended that whenever possible, reels needing repairs or general overhauling should be returned to the factory. NOTE: Please remove fishing line before returning reel. Allow 3-4 weeks for factory repair.
