

## Phase Change Worksheet II

ANSWERS

The graph was drawn from data collected as a substance was heated at a constant rate. Use the graph to answer the following questions.

At point A, the beginning of observations, the substance exists in a solid state. Material in this phase has DEFINITE volume and DEFINITE shape. With each passing minute, HEAT is added to the substance. This causes the molecules of the substance to MOVE/IRRATE more rapidly which we detect by a TEMPERATURE rise in the substance. At point B, the temperature of the substance is 70 °C. The solid begins to MELT. At point C, the substance is completely MELTED or in a LIQUID state. Material in this phase has DEFINITE volume and INDEFIN shape. The energy put to the substance between minutes 5 and 9 was used to convert the substance from a SOLID to a LIQUID.

Between 9 and 13 minutes, the added energy increases the TEMP of the substance. During the time from point D to point E, the liquid is BOILING. By point E, the substance is completely in the GAS phase. Material in this phase has INDEFIN volume and INDEFIN shape. The energy put to the substance between minutes 13 and 18 converted the substance from a LIQUID to a GAS state. Beyond point E, the substance is still in the GAS phase, but the molecules are moving FASTER/MORE as indicated by the increasing temperature.

Jade Morton, Frank van Diggelen, James J. Spilker, Jr., Bradford W. Parkinson, Sherman Lo, Grace Gao, 2020-12-17

Covers the latest developments in PNT technologies including integrated satellite navigation sensor systems and civil applications. Featuring sixty four chapters that are divided into six parts, this two volume work provides comprehensive coverage of the state of the art in satellite based position navigation and timing PNT technologies and civilian applications. It also examines alternative navigation technologies based on other signals of opportunity and sensors and offers a comprehensive treatment on integrated PNT systems for consumer and commercial applications.

Volume 1 of Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications contains three parts and focuses on the satellite navigation systems technologies and engineering and scientific applications. It starts with a historical perspective of GPS development and other related PNT development. Current global and regional navigation satellite systems GNSS and RNSS, their inter operability, signal quality monitoring, satellite orbit and time synchronization and ground and satellite based augmentation systems are examined. Recent progresses in satellite navigation receiver technologies and challenges for operations in multipath rich urban environment in handling spoofing and interference and in ensuring PNT integrity are addressed. A section on satellite navigation for engineering and scientific applications finishes off the volume.

Volume 2 of Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications consists of three parts and addresses PNT using alternative signals and sensors and integrated PNT technologies for consumer and commercial applications. It looks at PNT using various radio signals of opportunity, atomic clock, optical laser, magnetic field, celestial, MEMS and inertial sensors as well as the concept of navigation from Low Earth Orbiting (LEO) satellites. GNSS/INS integration, neuroscience of navigation and animal navigation are also covered. The volume finishes off with a collection of work on contemporary PNT applications such as survey and mobile mapping, precision agriculture, wearable systems, automated driving, train control, commercial unmanned aircraft systems, aviation and navigation in the unique Arctic environment. In addition, this text serves as a complete reference and handbook for professionals and students interested in the broad range of PNT subjects. Includes chapters that focus on the latest developments in GNSS and other navigation sensors, techniques and applications. Illustrates interconnecting relationships between various types of technologies in order to assure more protected, tough and accurate PNT.

Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications will appeal to all industry professionals, researchers and academics involved with the science, engineering and applications of position navigation and timing technologies.
