Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. A pot filled with snow is left on a hot stove for a while. What would happen? The snow would melt into water. The solid form of water would melt into the liquid form of water after it is boiled.
2. A phase is a state of matter, such as a solid, a liquid, or a gas. Which phases would you see? Explain. Some phases that I would see is solid ice, liquid water, and water vapor.
3. A phase change is a change from one phase to another. What phase changes would you see in this example? Some phase changes that I will see is melting, boiling, and condensation.

Gizmo Warm-up

In the *Phases of Water* Gizmo, you can heat up or cool down a beaker of water.

1. Press **Heat** to heat up the water. Wait until the temperature stops rising and observe. What happens?

The water heats up. After the water heats up for a bit, you can see bubbles that indicate that the water is boiling. Because steam rises from the water, the lid lifts.

2. Why do you think the lid lifts up? Because the steam from the boiling water lifts it up.
3. Now press **Chill** to remove thermal energy from the water. What happens now? The boiling stops and the water level drops. The water's temperature drops, and the water freezes into ice. The lid also drops when it freezes.
