Philip Mohr Understanding Macroeconomics:

Understanding Macroeconomics Philip Mohr, Cecilia Van Zyl, Anmar Pretorius, 2018 *Understanding Macroeconomics* Philip Mohr, 2012 *Understanding Macroeconomics* P. Mohr, **Leading Issues in South African Macroeconomics**, 1989 *Democracy under Construction* Ursula J. van Beek, 2005-09-12 The book compares five newly emerged democracies in Europe South East Asia Latin America and Africa Cutting across vastly different historical and cultural backgrounds it tells the story of how societies come to terms with a painful past and how politics culture and the economy intertwine in the process of creating new democratic nations The Explanatory Power of Business Cycle Surveys Karl Heinrich Oppenländer, Günter Poser, 1994 The 21st CIRET Conference was held in Somerset West near Cape Town about six months before the new constitutional elections were scheduled for South Africa Because of this historically important event the conference participants were informed about the economic and political problems of the country by Servaas van der Berg and Hennie Kotze from the University of Stellenbosch Shadow of Liberation Vishnu Padayachee, Robert Van Niekerk, 2019-10-01 Shadow of Liberation explores the intricate twists turns contestations and compromises of ANC economic and social policymaking with a focus on the transition era of the 1990s and the early years of democracy With the damning revelations by the Zondo Commission of Inquiry into State Capture on the massive corruption of the South African body politic the timing of this book could not be more relevant South Africans need to confront the economic and social policy choices that the liberation movement made and to see how these decisions may have facilitated the conditions for corruption to emerge and flourish Answers are needed Padayachee and van Niekerk focus their attention on the primary question of how and why the ANC given its historical anti inequality redistributive stance come in the 1990s to such a dramatic turn around and move towards an essentially market dominated approach Were they pushed or did they go willingly What role if any did Western governments and international financial institutions play And what of the role of the late apartheid state and South African business Did leaders and comrades sell out the ANC's emancipatory policy vision Shadow of Liberation tries to provide answers to these questions drawing on the best available primary archival evidence as well as extensive interviews with key protagonists across the political non government and business spectrum The authors argue that the ANC's emancipatory policy agenda was broadly to establish a social democratic welfare state upholding rights of social citizenship However its economic policy framework to realise this emancipatory mission was either non existent or egregiously misguided Hayek, Co-ordination and Evolution Jack Birner, Rudy van Zijp, 2002-09-11 Recent years have witnessed a remarkable revival in Hayek's reputation as an economist a political philosopher and an intellectual historian This book shows why this revival has taken place by demonstrating the continuing relevance and vitality of Hayek's ideas A group of internationally known scholars of both the left and the right critically assess his contribution to economics political philosophy legal theory cognitive psychology and the history of ideas **Money, Macroeconomics and Keynes** Philip

Arestis, Meghnad Desai, Sheila Dow, 2013-06-17 This volume along with its companion volume *Methodology Microeconomics and Keynes* is published in honour of Victoria Chick inspired by her own contributions to knowledge in all of these areas and their interconnections It represents both consolidation and the breaking of new ground in Keynesian monetary theory and macroeconomics by leading figures in these fields *The Business Cycle and the Long Wave* Johan Cloete, 1990

Prospects for Monetary Cooperation and Integration in East Asia Ulrich Volz, 2010 East Asian countries were notably uninterested in regional monetary integration until the late 1990 s when the Asian financial crisis revealed the fragility of the region s exchange rate arrangements and highlighted the need for a stronger regional financial architecture Since then the countries of East Asia have begun taking steps to explore monetary and financial cooperation establishing such initiatives as regular consultations among finance ministers and central bank governors and the pooling of foreign exchange reserves In this book Ulrich Volz investigates the prospects for monetary cooperation and integration in East Asia using state of the art theoretical and empirical tools to analyze the most promising policy options *South African National Bibliography*, 1991 *The Economic Democratisation of South Africa* Bax Nomvete, 1993 **Economic Policy-making in South Africa** Philip Mohr, 1993 **Macroeconomics, Finance and Money** Giuseppe Fontana, John McCombie, Malcolm Sawyer, 2010-03-11 This volume focuses on current issues of debate in the area of modern macroeconomics and money written from a broadly interpreted post Keynesian perspective The papers connect with Philip Arestis contributions to macroeconomics and money and pay tribute to his distinguished career **Work for Justice**, 2002 **Economics for South African Students** Philip Mohr, 2015 **Advancing Regional Monetary Cooperation** L. Mühlich, 2014-08-29 This book examines regional monetary cooperation as a strategy to enhance macroeconomic stability in developing countries and emerging markets Interdisciplinary case studies on Southern Africa Southeast Asia and South America provide a cross regional perspective on the viability of such strategy *Economics for South African Students* Philip Mohr, 2004 This title is an introduction to economics in general set against a contemporary South African background The practical examples make this publication extremely accessible [Financial Market Drift](#) Lukas Menkhoff, Norbert Tolksdorf, 2012-12-06 International financial markets play an increasing role in the mind of the general public much more than they did a few decades ago There can be no doubt that the size of financial markets has grown at a faster pace than the markets for goods and services in the past ten or twenty years However it is still unclear whether this is a desirable development or whether it indicates looming risks The book documents and classifies the debate about the potential decoupling of the financial sector from the real economy and then to introduce it into the context of established scientific lines of research We try to provide a logical structuring of the heterogeneous arguments by postulating a decoupling hypothesis phenomena causes consequences Various models are presented in this structure and stylized facts can be isolated
