At a time when entries for UK school exams in modern foreign languages are decreasing, this book serves the urgent need for research and guidance on ab initio learning and teaching in HE. Using the example of teaching German, it offers theoretical reflections on teaching ab initio and practice-oriented approaches that will be useful for teachers of both German and other languages in higher education. The first chapters assess the role of ab initio provision within the wider context of modern languages departments and language centres. They are followed by sections on teaching methods and innovative approaches in the ab initio classroom that include chapters on the use of music, textbook evaluation, the effective use of a flipped classroom and the contribution of language

apps Finally the book focuses on the learner in the ab initio context and explores issues around autonomy and learner strengths The whole builds into a theoretically grounded guide that sketches out perspectives for teaching and learning ab initio languages that will benefit current and future generations of students **Neue Horizonte** Dollenmayer, David B. Dollenmayer, Thomas S. Hansen, Thomas Hansen, PH D, 2000-11 This introductory text is based on a successful four skills approach to German that stresses communicative competence cultural awareness and mastery of language structures Each lesson includes Dialoge which introduces new grammar and vocabulary in context two Wortschatz sections 1 contains words and phrases from Dialoge and other related items for use in exercises and 2 contains vocabulary needed to understand Lesestuck reading and Variationen activities that encourage students to use material from the Dialoge to express their own thoughts ideas and experiences *Student Activities Manual for Neue Horizonte* Ellen W. Workbook/laboratory Manual for Neue Horizonte David B. Dollenmayer, 1996 *Formal Approaches to Multilingual Phonology* Jennifer Cabrelli, Baris Kabak, John Archibald, 2025-09-22 Over the past 30 years formal approaches to second and additional language acquisition SLA have made great advances in understanding the nature of the multilingual mind However it is undeniable that most of the research into the speech of learners and multilinguals has focused on more phonetic rather than phonological approaches These phonetic approaches among other contributions enrich our understanding of surface variation in the production and perception of various sound phenomena Complementing these phonetic approaches phonological approaches seek to describe mental representations that connect sound and meaning and may tell us about both universal and language specific patterns in non native development and use Studies undertaking these objectives however are comparatively scarce in the literature particularly those whose empirical examination of SLA seek to further develop complex linguistic models of the mental representation of phonology and to inform phonological theory
