Geology Attila Vértes,Sándor Nagy,Károly Süvegh,2012-12-06 This book appears a century after the discovery of
radioactivity It was in 1896 when Henri Becquerel reported his first results about the penetrating radiation which could
darken the packed photographic plates The initial fascination of radioactivity e g the discovery of new radioactive elements
the first real description of the structure of atoms and their nuclei the applications of radiotracers the high sensitivity of
activation analysis etc was followed by the use of atomic bomb in 1945 The mushroom cloud became a symbol of destructive
nuclear power And even nuclear energy production which provides about 20% of the world s electricity is overshadowed by
radioactive waste However the latest results suggest that the Accelerator Driven Transmutation Technology ADTT will solve
this problem since this technique can decrease the lifetime of the fission products comparatively to the human lifespan
Practical control of fusion may also be possible in the first decades of the next millennium *State Library Bulletin:*
