book's 16 chapters into 59 short modules is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose.
