**Metal-Catalysed Reactions of Hydrocarbons** Geoffrey C. Bond,2006-10-03 This unique book drawing on the author's lifetime experience critically evaluates the extensive literature on the field of Metal Catalysed Reactions of Hydrocarbons. Emphasis is placed on reaction mechanisms involving hydrogenation, hydrogenolysis, skeletal and positional isomerisation and exchange reactions. The motivation for fundamental research in heterogeneous catalysis is to identify the physicochemical characteristics of active centres for the reaction being studied to learn how these may be modified or manipulated to improve the desired behavior of the catalyst and to recognize and control those aspects of the catalyst's structure that limit its overall performance. By restricting the subject of the book to hydrocarbons, Bond has progressively developed the subject matter to include areas of importance both to researchers and to those working in the industry.      A Monthly List of All New Books Published in Great Britain ,1844      **Farmers and Consumers Market Bulletin** ,2009      **Better Roads** ,1990      **Farm Implement News Buyer's Guide** Farm Implement News Co., Chicago, Farm Implement News Company,1955      **The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces** ,1896      **AB Bookman's Weekly** ,1989      New York Times Saturday Review of Books and Art ,1969 Presents extended reviews of noteworthy books, short reviews, essays and articles on topics and trends in publishing, literature, culture and the arts.
