Corbusier's Practical Aesthetic of the City Christoph Schnoor, 2020-10-18 Set within an insightful analysis this book describes the genesis ideas and ideologies which influenced La Construction des Villes by Le Corbusier This volume makes the important theoretical work available for the first time in English offering an interpretation as to how much and in what way his essai may have influenced his later work Dealing with questions of aesthetic urbanism La Construction des Villes shows Le Corbusier s intellectual influences in the field of urbanism Discontent that the script was not sufficiently avant garde he abandoned it soon after it was written in the early 20th century It was only in the late 1970s that American historian H Allen Brooks discovered 250 pages of the forgotten manuscript in Switzerland The author of this book Christoph Schnoor later discovered another 350 handwritten pages of the original manuscript consisting of extracts chapters and bibliographic notes This splendid find enabled the re establishment of the manuscript as Le Corbusier had abandoned it unfinished in the spring of 1911 This volume offers an unbiased extension of our knowledge of Le Corbusier and his work In addition it reminds us of the urban design innovations of the very early 20th century which can still serve as valuable lessons for a new understanding of contemporary urban design Objects of Design from the Museum of Modern Art Paola

woodworking and archival practices account for how the material and the immaterial draw attention to each other in both their everyday and artistic practice Each chapter addresses particular systems from the human body to manually operated tools and machines materials for instance cloth wood and light modes of attention movement and engagement Surface therefore functions in this book as a multidisciplinary method for attending to critical issues concerning human creative and technological endeavours

Sustainable Lina Annette Condello, Steffen Lehmann, 2016-08-30 This essential book unravels the link between regional cultures adaptive reuse of existing buildings and sustainability It concentrates on the social dimensions relating to Brazilian architect Lina Bo Bardi's late adaptive reuse projects and works from the 1960s to the early 1990s interpreting her themes technical sources and design strategies of the creation of luxury as sustainability The edited book charts how Lina Bo Bardi invented her own version of sustainability introduced this concept through her landscape and adaptive reuse designs and through ideas about cross cultures in Brazil The book offers a critical reflection exploration and demonstration of the importance of adaptive reuse in the landscape and related themes for researchers and provides researchers and students new material on sustainability for further study In the context of the plurality of revisions of Lina Bo Bardi's work this book brings about a refreshed interpretation of her integrative approach to adaptive reuse of buildings and landscapes as a significant contribution to the sustainability debate It offers new insights into the construction of discourses about sustainability from the perspective of one of the key architects in the period to operate in the interface between modernity and tradition Dr Fabiano Lemes de Oliveira Senior Lecturer University of Portsmouth UK Adaptability is one of the most important words in sustainable architecture today From this perspective this book looks at the work of a master of Brazilian modernism with lessons to be learnt on how to qualify indoor and outdoor spaces in social environmental and architectural terms Adaptive strategies as those seen throughout the work of Bo Bardi are key instrument tools concept to sustainable buildings and cities Professor Joana Carla Soares Goncalves FAU University of Sao Paulo Brazil The year 2015 marked the centenary of Lina Bo Bardi This book is looking at Bardi's work through the perspective of adaptive reuse Bringing together specialists on sustainability with specialists of Lina's work the book generates an interesting new layer of discussion on the work of an architect that was never shy of controversy Associate Professor Fernando Luiz Lara University of Texas at Austin USA This collection of essays makes a very important and engaging contribution to suggest that to take Lina as an inspiration is to deal with her contradictions and to evaluate the stakes of what she struggled with in a 21st century world What the authors gathered here and have laid out is a very timely invitation to discern Lessons from Lina in relationship to today's pressing issues of architecture and environment sustainability recycling and developing an ethical design position in a world of diminishing resources and escalating challenges Prof Barry Bergdoll Columbia University and MoMA New York USA The book features a Foreword by Barry Bergdoll Winner of the Curtin University Humanities Research Award 2017 for Best Book of the Year Oct 2017 Here the judges appraisal An elegantly conceptualised and carefully crafted

volume that represents the work of the twentieth century Brazilian architect Lina Bo Bardi through the lens of urgent contemporary questions of sustainability adaptive re use and ethical design The book brings together a multidisciplinary and international collection of authors and addresses a global readership It is beautifully presented and intelligently edited Jury Book Award 2017 Winner of the Curtin University Humanities Research Award 2017 for Best Chapter of the Year Sept 2017 Annette Condello Chapter 3 Salvaging the Site s Luxuriance Lina Bo Bardi Landscape Architect Here the judges appraisal A richly textured investigation of Lina Bo Bardi a complex fascinating and important Italian born Brazilian architect designer and co founder of the magazine Habitat This chapter is a thoughtful and respectful but also critical piece combining thorough research with deft analysis and carefully selected images and the publication has been highly recommended by leading academics and curators Jury Book Award 2017 *Alison and Peter Smithson* Alison Smithson, Peter Smithson, Beatriz Colomina, Design Museum (London, England), 2004 Striving to adapt the progressive ideas of the pre war modern movement to the specific human needs of post war reconstruction Alison and Peter Smithson were among the most influential and controversial architects of the latter half of the twentieth century As younger members of CIAM Congr s Internationaux d Architecture Moderne and as founding members of Team 10 they were at the heart of the debate on the future course of Modern Architecture Their polemics and designs addressing issues such as the rising consumer society and the orientation of urban planning laid the foundations for New Brutalism and the Pop Art Movement of the 1960s An important adaptation made by the Smithsons and their generation was the rejection of modernism s machine aesthetics The new notions of place and territory were juxtaposed to Le Corbusier s machine habiter To the Smithsons a house was a particular place which should be suited to its location and able to meet the ordinary requirements of everyday life and to accommodate its inhabitants individual patterns of use This exhibition examines the evolution of the Smithsons approach to this everyday art of inhabitation It does this by extensively documenting most of their designs for individual dwellings especially their optimistic House of the Future of 1956 and the series of renovations of and additions to the fairy tale like Hexenhaus in Germany from the late 1980s onward **Hooked Rugs** Cynthia Fowler, 2017-07-05 Through a close look at the history of the modernist hooked rug this book raises important questions about the broader history of American modernism in the first half of the twentieth century Although hooked rugs are not generally associated with the avant garde this study demonstrates that they were a significant part of the artistic production of many artists engaged in modernist experimentation Cynthia Fowler discusses the efforts of Ralph Pearson and of Zoltan and Rosa Hecht to establish modernist hooked rug industries in the 1920s uncovering a previously undocumented history The book includes a consideration of the rural workers used to create the modernist narrative of the hooked rug as cottage industries were established throughout the rural Northeast and South to serve the ever increasing demand for hooked rugs by urban consumers Fowler closely examines institutional enterprises that highlighted and engaged the modernist hooked rugs such as key exhibitions at the Museum of Modern Art

and the Metropolitan Museum of Art in the 1930s and 40s This study reveals the fluidity of boundaries among art craft and design and the profound efforts of a devoted group of modernists to introduce the general public to the value of modern art

Architectural Publications Index ,2003 *Twentieth-Century Pattern Design* Lesley Jackson,2007-02-08 Twentieth Century Pattern Design combines photographs including many newly published images with soundly researched text creating an essential resource for enthusiasts and historians of modern design The book also serves as a creative sourcebook for students and designers inspiring new flights of fancy in pattern design Jacket *Herbert Bayer, Graphic Designer* Patrick Rössler,2023-05-18 Herbert Bayer was one of the most extraordinary artists associated with the Bauhaus school A true multimedia artist he united graphic design art and architecture in a unique style that came to represent the bold aesthetic approach of the movement A teacher with the school until 1928 Bayer went on to become a highly successful graphic designer in Germany and later one of the most prominent figures in the 20th century art scene of the United States This broad biographical account which presents previously unseen archival photographs and episodes from the life of Bayer and other influential Bauhaus artists such as Walter Gropius Marcel Breuer and L szl Moholy Nagy follows Bayer through the Weimar Republic Nazi Germany and finally to his exile in the United States Specifically Patrick R ssler reveals for the first time Bayer s unique experience of 1930s Germany where with his commercial and artistic life shattered by terror and censorship he distracted himself with leading a hedonistic life Shining a light on Bayer s time in Berlin during the Weimar Republic and his route out of the Nazi state R ssler provides rich new insights into how Bauhaus artists navigated a protracted period of social upheaval and dictatorship where commercial success was fraught with a deep hostility towards the regime and the temptations of emigration Revealing the tensions of an avant garde artist struggling to practice during a period of repression Herbert Bayer Graphic Designer speaks to both the memory of those who left Nazi Germany but also the perseverance of artists and intellectuals throughout history who have worked under authoritarian regimes Drawing on never before interpreted documents letters and archival material R ssler tells Bayer s compelling story documenting the life of a unique artist and offering a valuable contribution to research in migr experiences **Sacred Buildings** Rudolf Stegers,2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis

of the conceptual and formal aspects that combine to create the religious impact of spaces e g the ground plan the shapes of the spaces the incidence of light and materiality *Making a New World* Tom Avermaete, 2012 A heavily illustrated study of the foundations and working mechanisms of modern communities
