

- **Economic Fluctuations:** If the private sector is not properly controlled by the government, economic fluctuations and unemployment can occur.
- **Corruption and Black Markets:** Usually, if government policies, rules and directives are not effectively implemented, corruption and black markets appear.

To Sum Up: Although, in concept a mixed economy is ideal because it incorporates the advantages of both capitalism and socialism, its success depends totally on government efficiency and effectiveness. The system has been successfully adopted by some countries, including Sweden, Denmark and Switzerland, but it has not given appropriate results in many other countries.

Note:

The capitalist (market) and socialist (command) economies are two extremes. In actuality, no contemporary society falls completely into either of these polar categories. Rather, all societies today are mixed economies, with elements of both capitalism and socialism.

Behavioral Science & Policy: Volume 2, Issue 1 Craig Fox,Sim B. Sitkin,2016-11-22 The success of nearly all public and private sector policies hinges on the behavior of individuals groups and organizations Today such behaviors are better

understood than ever thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground, a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of BSP is broad, with topics spanning health care, financial decisionmaking, energy, and the environment, education and culture, justice and ethics, and work place practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective.
