SETTING THE STAGE World War II was one of history's most devastating conflicts. More than 55 million people died as a result of bombings, the Holocaust, combat, starvation, and disease. Near the end of the war, one of humankind's most destructive weapons, the atomic bomb, killed more than 100,000 people in Hiroshima and Nagasaki in a matter of minutes. Perhaps because of these horrors, world leaders look for ways to make the earth a safer, more secure place to live.

Issues of War and Peace

In the years after the end of World War II, the Cold War created new divisions and tensions among the world's nations. This uneasy situation potentially threatened the economic, environmental, and personal security of people across the world. So, nations began to work together to pursue collective security.

Nations Unite and Take Action Many nations consider that having a strong military is important to their security. After World War II, nations banded together to create military alliances. They formed the North Atlantic Treaty Organization (NATO), the Southeast Asia Treaty Organization (SEATO), the Warsaw Pact, and others. The member nations of each of these alliances generally pledged military aid for their common defense.

In addition to military alliances to increase their security, world leaders also took steps to reduce the threat of war. The United Nations (UN) works in a variety of ways toward increasing collective global security.

Peacekeeping Activities One of the major aims of the UN is to promote world peace. The UN provides a public forum, private meeting places, and skilled mediators to help nations try to resolve conflicts at any stage of their development. At the invitation of the warring parties, the UN also provides peacekeeping forces. These forces are made up of soldiers from different nations. They work to carry out peace agreements, monitor cease-fires, or put an end to fighting to allow peace negotiations to go forward. They also help to move refugees, deliver supplies, and operate hospitals.

As of June 2007, the UN had over 82,000 soldiers and police in 16 peacekeeping forces around the world. Some forces, such as those in India, Pakistan, and Cyprus, have been in place for decades.

Ethics and Global Security Anthony Burke, Katrina Lee-Koo, Matt McDonald, 2014-06-27 This book will be the first systematic examination of the role that ethics plays in international security in both theory and practice and offers the reader a concrete ethics for global security Questions of morality and ethics have long been central to global security from the death camps world wars and H bombs of the 20th century to the humanitarian missions tsunamis terrorism and refugees of the 21st This book goes beyond the Just War tradition to demonstrate how ethical commitments influence security theory policy and international law across a range of pressing global challenges The book highlights how from patrolling a territorial border to maintaining armed forces security practices have important ethical implications by excluding some from consideration presenting others as potential threats and exposing them to harm and licensing particular actions While many scholars and practitioners of security claim little interest in ethics ethics clearly has an interest in them This innovative book extends the traditional agenda of war and peace to consider the ethics of force short of war such as sanctions deterrence

terrorism targeted killing and torture and the ethical implications of new security concerns such as identity gender humanitarianism the responsibility to protect and the global ecology It advances a concrete ethics for an era of global threats and makes a case for a cosmopolitan approach to the theory and practice of security that could inspire a more just stable and inclusive global order This book fills an important gap in the literature and will be of much interest to students of ethics security studies and international relations

Interpreting Global Security Mark Bevir, Oliver Daddow, Ian Hall, 2013-08-15 This edited collection explores the fruitfulness of applying an interpretive approach to the study of global security The interpretive approach concentrates on unpacking the meanings and beliefs of various policy actors and crucially explains those beliefs by locating them in historical traditions and as responses to dilemmas Interpretivists thereby seek to highlight the contingency diversity and contestability of the narratives expertise and beliefs that inform political action The interpretive approach is widespread in the study of governance and public policy but arguably it has not yet had much impact on security studies The book therefore deploys the interpretive approach to explore contemporary issues in international security combining theoretical engagement with good empirical coverage through a novel set of case studies Bringing together a fresh mix of world renowned and up and coming scholars from across the fields of security studies political theory and international relations the chapters explore the beliefs traditions and dilemmas that have informed security practice on the one hand and the academic study of security on the other as well as the connections between them All contributors look to situate their work against a broader historical background and long standing traditions allowing them to take a critical yet historically informed approach to the material

The European Union in Global Security R. Ginsberg, S. Penksa, 2012-02-14 Does the EU matter in international security The authors identify and explain the drivers of and brakes to EU foreign security action offer methods of assessment to ascertain influence and conclude that the union has become a niche international security provider that has in turn strengthened EU foreign policy

Chinese Macrosecuritization Juha A. Vuori, 2023-11-10 This book provides a holistic picture of Chinese global security discourses with a focus on macrosecritizations The work examines how the People s Republic of China PRC has aligned itself within global security discourses This is approached through the theory of securitization specifically by using the notion of macrosecritization as the lens for its analysis The book offers the first full account of Chinese macrosecritization discourses and alignments and it aims to discern what security speech with referent objects such as humanity civilization or nature has done in the domestic and international politics of China Specifically the work focuses on the discourses of the Cold War anti nuclear weapons climate change and the Global War on Terror which have all been postulated in the literature as macrosecritizations In addition it examines discourses with global referent objects that have been put forth by the PRC so that we can see whether its proposals for global security governance take the form of or are legitimated through macrosecritization The overall argument in the book is that the way contemporary China uses macrosecritization discourses provides for ontological security as its position in relation to other major powers is undergoing transformation by allowing it to maintain a consistent narrative of its international self that abides by its own set of moral values and sense of worth This book will be of interest to students of critical security studies Chinese politics and International Relations The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution NonCommercial ShareAlike CC BY NC SA 4 0 International
