World History: Patterns of Interaction McDougal-Littell Publishing Staff,2004-03 McDougal Littell World History: Patterns of Interaction McDougal-Littell Publishing Staff,2004-03-11 **Industrial World** ,1914 *Efficiency and Justice in the Industrial World: v. 1: The Failure of the Soviet Experiment* Dusan Pokorny,2019-07-04 In the last years of the Soviet Union with remarkable suddenness it became commonplace to observe that what the country needed was a free market private property and integration into the global economy But why aside from the obvious fact that the alternative was failing should this consciousness dawn in our day This book argues that the time has come to reflect on what the epochal events of our era are teaching us about larger questions the relationship between economy and society culture and market Dusan Polorny asks precisely these questions revisiting the ideas of classic and contemporary philosophers in the light of the failure of the Soviet order and the exigencies of post Soviet transformation As Pokorny also points out integration in a post industrial global economy entails profound changes in the domain of property rights a redefinition of the relation between equity and efficiency and a regrounding of national consciousness The present volume examines the implications of these demands for the post Soviet societies another on the European and North American experiments in economic integration is in preparation

Industrial and Trade Policy Reform in Developing Countries Ramesh Adhikari,Colin H. Kirkpatrick,John Weiss,1992

Efficiency and Justice in the Industrial World: The failure of the Soviet experiment Dušan Pokorný,1993 In the last years of the Soviet Union it suddenly became commonplace to claim that what the country needed was a free market private property and integration into the global economy But why should this consciousness dawn in our day This book examines the issues and aims to answer that question *Reforming the United Nations* Joachim M. Müller,Joachim W. Müller,2001-06-27 The context in which the United Nations operates is one of change and reorientation change in the political climate resulting in changes in the tasks the organisation is called upon to undertake reorientation of the organisation s internal structures and procedures in response to these changes The principal goals and objectives of the United Nations have recently been reassessed This reassessment highlighted in the Reform Agenda of Secretary General Kofi Annan and during the Millennium Summit has led to a reaffirmation by the 189 Member States of their belief in the organisation New forms of consensus and co operation are developing regarding what the United Nations should be striving to achieve and how best it should be organised to improve its operations The UN and Kofi Annan were awarded the Nobel Peace Prize for their role in reforming the 56 year old institution Herald Tribune Honor Awarded to Annan and UN October 13 14 2001 p 1 The Quiet Revolution is essentially about the reform efforts of Kofi Annan The book therefore describes a major part of his activities leading to the award Dr Joachim Muller presents a detailed review of the reform initiatives undertaken during the period from 1996 to 2000 which was of such importance for the evolution of the United Nations A wealth of information from primary sources is provided together with an informative analysis of the history of reform within

the United Nations since its creation From the foreword by Jean Pierre Halbwachs Assistant Secretary General Controller United Nations Also by Joachim Muller Reforming the United Nations New Initiatives and Past Efforts a three volume set containing 50 key reform proposals originating inside and outside the United Nations *The New Conservatism* Jürgen Habermas, 2018-03-13 Jürgen Habermas is well known for his scholarly writings on the theoretical foundations of the human sciences *The New Conservatism* brings to light another side of Habermas's work showing him to be an incisive commentator on a wide range of contemporary themes The 1980s have been a crucial decade in the political life of Western democracies in general and of the Federal Republic of Germany in particular The transformations that accompanied a shift from 13 years of Social democratic rule in Germany to government by the conservative Christian Democrats are captured in this series of insightful often passionate political and cultural commentaries The central theme uniting the essays is the German problem of coming to terms within the past a problem that has important implications outside Germany as well Of particular note are the essays on what has come to be known as the Historians' Debate Habermas's attack on the revisionist German historians who have been trying to trivialize and normalize the history of the Nazi period and his defence of the need for a realistic and discriminating approach to the Nazi period and its legacy Habermas also takes up the recent debate concerning Martin Heidegger's involvement with Nazism and the rise of the neoconservative movement in Europe and America In particular the essay on *The New Obscurity* combines Habermas's analysis of the problems of the welfare state with his suggestions for avenues open to utopian impulses today *Architecture Theory since 1968* K. Michael Hays, 2000-02-28 An anthology of the pivotal theoretical texts that have defined architecture culture in the late twentieth century In the discussion of architecture there is a prevailing sentiment that since 1968 cultural production in its traditional sense can no longer be understood to rise spontaneously as a matter of social course but must now be constructed through ever more self conscious theoretical procedures The development of interpretive modes of various stripes post structuralist Marxian phenomenological psychoanalytic as well as others dissenting or eccentric has given scholars a range of tools for rethinking architecture in relation to other fields and for reasserting architecture's general importance in intellectual discourse This anthology presents forty seven of the primary texts of architecture theory introducing each with an explication of the concepts and categories necessary for its understanding and evaluation It also presents twelve documents of projects or events that had major theoretical repercussions for the period Several of the essays appear here in English for the first time Contributors Diana Agrest Stanford Anderson Archizoom George Baird Jennifer Bloomer Massimo Cacciari Jean Louis Cohen Beatriz Colomina Alan Colquhoun Maurice Culot Jacques Derrida Ignasi de Sol Morales Peter Eisenman Robin Evans Michel Foucault Kenneth Frampton Mario Gandelsonas Frank Gehry Jürgen Habermas John Hejduk Denis Hollier Bernard Huet Catherine Ingraham Fredric Jameson Charles A Jencks Jeffrey Kipnis Fred Koetter Rem Koolhaas Leon Krier Sanford Kwinter Henri Lefebvre Daniel Libeskind Mary McLeod Alberto Pérez Gómez Jos Quetglas Aldo Rossi Colin Rowe Massimo Scolari Denise Scott Brown

Reforming Collateral Laws to Expand Access to Finance Heywood W. Fleisig, 2006 Most readers especially those with car loans or home mortgages know about collateral property that the lender can take away from the borrower in the event that the borrower defaults In low middle income countries it is understood that conservative lenders exclude firms from credit markets with their excessive collateral requirements Usually this is because only some property is acceptable as collateral large holdings of urban real estate and sometimes new motor vehicles Microenterprises SMEs and the poor have little of this property but they do have an array of productive assets that could easily be harnessed to serve as collateral It is only the legal framework which prevents firms from using these assets to secure loans In countries with reformed laws governing collateral property such as equipment inventory accounts receivable livestock are considered excellent collateral This book aims to better equip project managers to implement reforms to the legal and institutional framework for collateral secured transactions It discusses the importance of movable property as a source of collateral for firms the relationship between the legal framework governing movable assets and the financial sector consequences for firms better loan terms increased access more competitive financial sector and how reforms can be put in place to change the lending environment

Reforming Asian Socialism John McMillan, Barry Naughton, 1996 Examines the dramatic transformation of Asian communist countries China in particular to vigorous market economies

The Oxford Companion to Comparative Politics Joel Krieger, 2013 The two volume Oxford Companion to Comparative Politics fills a gap in scholarship on an increasingly important field within Political Science Comparative Politics the discipline devoted to the politics of other countries or peoples has been steadily gaining prominence as a field of study allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit Comparativists apply various theories and concepts to analyze the similarities and differences between political units using the results of their research to develop causalities and generalizations Each of these theories and outcomes are thoroughly defined in the Companion as are major resultant conclusions those comparativists who have influenced the field in significant ways and politicians whose administrations have shaped the evaluation of contrasting governments Approximately 200 revised and updated articles from the Oxford Companion to Politics of the World would serve as a foundation for the set while over 100 new entries would thoroughly examine the field in a lasting more theoretical than current event based way New entries cover such topics as failed states Grand Strategies and Soft Power important updates include such countries as China and Afghanistan and issues like Capital Punishment Gender and Politics and Totalitarianism Country entries include the most significant nations to permit a focus on non time sensitive analysis In addition 25 1 000 word interpretive essays by notable figures analyze the discipline its issues and accomplishments Collectively entries promote deeper understanding of a field that is often elusive to non specialists
