

## INTRODUCTION

This service manual provides the technical information needed to properly service and maintain the Models LS160 and LS190 skid steers. Use it in conjunction with the operator's manual which is supplied with the skid steer. Keep both manuals available for ready reference.

The LS160 and LS190 have many similarities with the major difference being a two-speed hydrostatic motion system, which is an option on the LS160 and standard on the LS190.

The LS160 skid steers are equipped with the 332T non-emulsified or the 332TUF emulsified three-cylinder 60 net horsepower turbocharged engine.

The LS190 is equipped with the 450HC emulsified four-cylinder 75 net horsepower naturally aspirated engine.

Whenever working on New Holland equipment, left and right sides of the machine are determined by standing behind the unit, looking in the direction of travel.

The easiest and least time-consuming removal, disassembly, and assembly procedure are detailed in the manual. Modifying these procedures is not recommended.

New Holland skid steers are designed with emphasis on safety for operator protection. However, careless and negligent operation can still result in serious injury to persons or property. Be sure to read and follow all safety instructions in this manual.

Your New Holland dealer is interested in your obtaining the most from your investment and will be

glad to answer any questions you may have about your skid steer. Whenever service is required, your dealer's staff of trained service technicians is ready to serve you.

When in need of parts, always order genuine New Holland service parts from your New Holland dealer. Be prepared to give your dealer the model and serial number of the engine and skid steer (the location of these numbers is described later in this section). Record the serial numbers here.
