

### Viewing Guide: "Columbus's Native May Times, Customs, and Manners" Episode 2

**Directions:** Before viewing the film, read each question below to give focus to what information and ideas you should be looking for as you watch Episode 2. Record your answers to each question by providing as many facts, details, and examples as possible to answer each question. Be prepared to discuss your answers with the class.

1. At the time that the Spanish conquistadors invaded the New Empire, they were small with little of the technology. Describe this technology.

Answers will vary but should include: bows that made them appear like god-like half men, half beast warriors, body armor, guns, and steel swords.

2. What is Bartolomew's explanation for why the Spanish had advanced so much more while Inca's were still making tools and weapons from bronze?

Answer: Because Europe was geographically closer to the Middle East, they inherited the 7,000 years of metal technology that had been developed there. Because they had a diversified culture that allowed for specialization, the Spanish devoted time and effort in producing the longest, strongest, sharpest swords possible.

3. How did the battle tactics used by the Spanish conquistadors help the small army defeat the massive but unorganized army of the Incas?

Answer: The Spanishs fought by surrounding the Inca, firing their guns and sending out all killing on horseback. As they rode, the conquistadors used their swords to slash, cut, and stab the Inca who were panicking and fleeing rather than standing firm. Had the Inca known more about this style of fighting, they could have been victorious by their numbers if they had used their ground against the cavalry.

4. According to Bartolomew, what made the Europeans "architectural conquerors"?

Answer: Because of their geographic location and history, the Europeans were the first to acquire guns, guns, and steel, therefore they could conquer other more developed civilizations.
