An East Asian Challenge to Western Neoliberalism Niv Horesh, Kean Fan Lim, 2017-08-03

Analysts generally agree that in the long term the biggest challenge to American hegemony is not military but rather China's economic rise. This perception is spread in no small measure because Xi Jinping has in the face of patent military inferiority conducted himself much more boldly on the world stage than Hu Jintao. Meanwhile China has also begun conjuring up an alternative vision for global leadership now widely termed as the China model. This book therefore offers a critical and comprehensive explanation of the China model and its origins. Using a range of case studies covering varying historical and geographical approaches, it debates whether the Chinese experience in the last three decades of economic reform should be interpreted as an answer to the reigning hegemony of neoliberalism or rather a further reinforcement of it. To answer these questions, it provides an investigation into what China may have learned from its East Asian neighbours' earlier economic successes. It also examines how it is responding to and might even reconfigure the world political economic system as it develops fresh and potentially more powerful regulatory capacities. Providing a multi-dimensional analysis of the China model, the book will be of interest to students and scholars of Chinese Economics, Economic Geography and Chinese Studies.

Adventure Tourism David Huddart, Tim Stott, 2019-10-25

This textbook presents a comprehensive overview of the environmental impacts of various types of adventure tourism and how these can be best managed. This volume follows on from the authors' previous textbook *Outdoor Recreation: Environmental Impacts and Management* and continues the aim of developing a deeper understanding of how tourist numbers impact the environment and to provide practical solutions to these problems. Combining their own first-hand experience and research with extensive literature review, the authors present several popular adventure tourism destinations from across the globe including the Arctic, the Himalayas, Africa, Australia and Scotland as case studies. Chapters cover the particular challenges faced by each region, including impacts on animals and birds, the spread of invasive plant species and diseases, trail impacts on vegetation, impacts on geological, historical and archaeological sites, and pollution and waste issues. A discussion and evaluation of the possible management actions for minimising these impacts and how outdoor recreation tourists can be regulated concludes each chapter. This practical and engaging textbook will be invaluable to students and scholars of

adventure tourism and outdoor recreation as well as practitioners and managers working in the field

Team of Teams General Stanley McChrystal, Tantum Collins, David Silverman, Chris Fussell, 2015-05-12 From the New York Times bestselling author of *My Share of the Task* and *Leaders* comes a manual for leaders looking to make their teams more adaptable agile and unified in the midst of change When General Stanley McChrystal took command of the Joint Special Operations Task Force in 2004 he quickly realized that conventional military tactics were failing Al Qaeda in Iraq was a decentralized network that could move quickly strike ruthlessly then seemingly vanish into the local population The allied forces had a huge advantage in numbers equipment and training but none of that seemed to matter To defeat Al Qaeda they would have to combine the power of the world's mightiest military with the agility of the world's most fearsome terrorist network They would have to become a team of teams faster flatter and more flexible than ever In *Team of Teams* McChrystal and his colleagues show how the challenges they faced in Iraq can be relevant to countless businesses nonprofits and organizations today In periods of unprecedented crisis leaders need practical management practices that can scale to thousands of people and fast By giving small groups the freedom to experiment and share what they learn across the entire organization teams can respond more quickly communicate more freely and make better and faster decisions Drawing on compelling examples from NASA to hospital emergency rooms *Team of Teams* makes the case for merging the power of a large corporation with the agility of a small team to transform any organization

[ICTR 2020 3rd International Conference on Tourism Research](#) Dr. José Martí-Parreño, Dr. Roberto Gómez-Calvet, Dr. Javier Muñoz de Prat, 2020-03-27

Law, Migration, and Human Mobility Magdalena Kmak, 2023-09-14 This book analyses the multifaceted ways law operates in the context of human mobility as well as the ways in which human mobility affects law Migration law is conventionally understood as a tool to regulate human movement across borders and to define the rights and limits related to this movement But drawing upon the emergence and development of the discipline of mobility studies this book pushes the idea of migration law towards a more general concept of mobility that encompass the various processes effects and consequences of movement in a globalized world In this respect the book pursues a shift in perspective on how law is understood Drawing on the concepts of kinology and kinopolitics developed by Thomas Nail as well as mobility justice developed by Mimi Sheller the book considers movement and motion as a constructive force behind political and social systems and hence stability that needs to be explained and justified Tracing the processes through which static forms such as state citizenship or border are constructed and how they partake in production of differential mobility the book challenges the conventional understanding of migration law More specifically and in revealing its contingent and unstable nature the book reveals how human mobility is itself constitutive of law This interdisciplinary book will appeal to those working in the areas of migration and refugee law
