Thomas L. Shotwell* Thomas Latham Shotwell,1834 **Meeting the Demands of Reason** Jay Bergman,2011-03-15 The Soviet physicist dissident and human rights activist Andrei Sakharov 1921 1989 was awarded the Nobel Peace Prize in 1975 The first Russian to have been so recognized Sakharov in his Nobel lecture held that humanity had a sacred endeavor to create a life worthy of its potential that we must make good the demands of reason by confronting the dangers threatening the world both then and now nuclear annihilation famine pollution and the denial of human rights Meeting the Demands of Reason provides a comprehensive account of Sakharov's life and intellectual development focusing on his political thought and the effect his ideas had on Soviet society Jay Bergman places Sakharov's dissidence squarely within the ethical legacy of the nineteenth century Russian intelligentsia inculcated by his father and other family members from an early age In 1948 one year after receiving his doctoral candidate's degree in physics Sakharov began work on the Soviet hydrogen bomb and later received both the Stalin and the Lenin prizes for his

efforts Although as a nuclear physicist he had firsthand experience of honors and privileges inaccessible to ordinary citizens Sakharov became critical of certain policies of the Soviet government in the late 1950s He never renounced his work on nuclear weaponry but eventually grew concerned about the environmental consequences of testing and feared unrestrained nuclear proliferation Bergman shows that these issues led Sakharov to see the connection between his work in science and his responsibilities to the political life of his country In the late 1960s Sakharov began to condemn the Soviet system as a whole in the name of universal human rights By the 1970s he had become with Alexander Solzhenitsyn the most recognized Soviet dissident in the West which afforded him a measure of protection from the authorities In 1980 however he was exiled to the closed city of Gorky for protesting the Soviet invasion of Afghanistan In 1986 the new Gorbachev regime allowed him to return to Moscow where he played a central role as both supporter and critic in the years of perestroika Two years after Sakharov's death the Soviet Union collapsed and in the courageous example of his unyielding commitment to human rights skillfully recounted by Bergman Sakharov remains an enduring inspiration for all those who would tell truth to power

**On the Origin of Consciousness** Scott D. G. Ventureyra, 2018-11-29 Have you ever thought about how self consciousness self awareness originated in the universe Understanding consciousness is one of the toughest nuts to crack In recent years scientists and philosophers have attempted to provide an answer to this mystery The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything Without it reasoning would be impossible Dr Scott Ventureyra in this ground breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self consciousness He integrates philosophy theology and science in an innovative way to embark on this exploration
