

ACS (American Chemical Society) Style Guidelines Quick Guide

This web guide is based on the second edition of *The ACS Style Guide: A Manual for Authors and Editors* (1997). For a more thorough discussion refer to *The ACS Style Guide* which is available at the Chemistry and Engineering Libraries (Call number QD8.5.A25 1997 Reference Section).

Citing References in the Body of a Paper

References in the body of a paper can be cited:

- *By number (italics)*
The synthesis of the compound has been described previously (*1*).
- *By superscript*
The synthesis of the compound has been described previously.¹
- *By author name and date*
The synthesis of the compound has been described previously (Johnson, 1902).

With numerical citations, references should be numbered sequentially. If a reference is repeated, do not give it another number; rather, use the original reference number.

With author name citations, use both names if a reference has two authors (Jones and Smith, 2002). If there are more than two authors, use the first name followed by et al. (Harris et al., 2001).

Creating a Bibliography

- Arrange the references in your bibliography based on the method used for in-text citations. If numerical citations were used, then arrange references at the end of the paper numerically. If author names were used, arrange alphabetically.
- All references end with a period.
- Do not leave blank lines between references.
- Journal article titles and book chapter titles are not essential, but they are considered desirable.
- If a book as a whole is used, pagination is not necessary.

volume and FERPA so many things that most academics learned somewhere along the way and forget that others don't know. The alphabetical reference format enables readers to turn directly to the topic in question and find some borrowed wisdom. Each entry features a little storytelling then some larger context and leaves readers able to put on the mask of the capable scholar even though they feel like impostors. One of the puzzles which they encounter at the college and university after reporting for studies is the course assignments offered to them by their lecturers which demand them to be critical thinkers and argumentative essay writers. In most colleges and universities lecturers provide to students broad questions to answer in the form of essays either in group or individual assignments. How should they turn the broad assignment questions provided to them by their lecturers into specific researchable topics for essays? How should they handle literature in order to obtain valuable information to answer the provided question? How should they construct an informed and convincing argument using the collected information as evidence? This book concerns these and other related questions. With its clear illustrations the book is designed to be a self study guide and to offer solutions to many struggling students in colleges and universities. At the same time the book can be helpful for lecturers to instruct their students how to write effective course assignments in their respective courses. Plagiarism Education and Prevention

Cara Bradley, 2011-02-17 Academic librarians and university instructors worldwide are grappling with an increasing incidence of student plagiarism. Recent publications urge educators to prevent plagiarism by teaching students about the issue and some have advocated the value of a subject specific approach to plagiarism prevention education. There is, however, a complete lack of resources and guidance for librarians and instructors who want to adopt this approach in their teaching. This book opens with a brief overview of plagiarism today, followed by arguments in favour of a subject based approach. The rest of the book is divided into academic subject areas and features an overview of the major issues in that subject area, followed by a high profile and engaging case within the discipline. Subject based approach to highlight the differing issues and conventions of various disciplines. Real life cases to capture student attention and illustrate the implications of plagiarism in academia and beyond. Discussion questions to ensure an active and engaging student learning experience.
