Rediscover the diversity of modern African literatures with this authoritative resource edited by a leader in the field. How have African literatures unfolded in their rich diversity in our modern era of decolonization, nationalisms and extensive transnational movement of peoples? How have African writers engaged urgent questions regarding race, nation, ethnicity, gender and sexuality? And how do African literary genres interrelate with traditional oral forms or audio-visual and digital media? *A Companion to African Literatures* addresses these issues and many more. Consisting of essays by distinguished scholars and emerging leaders in the field, this book offers rigorous, deeply engaging discussions of African literatures on the continent and in diaspora. It covers the four main geographical regions: East and Central Africa, North Africa, Southern Africa and West Africa, presenting ample material to learn from and think with. *A Companion To African Literatures* is divided into five parts. The first four cover different regions of the continent while the fifth part considers conceptual issues and newer directions of inquiry. Chapters focus on literatures in European languages officially used in Africa: English, French and Portuguese, as well as homegrown African languages: Afrikaans, Amharic, Arabic, Swahili and Yoruba. With its lineup of lucid and authoritative analyses, readers will find in *A Companion to African Literatures* a distinctive, rewarding academic resource. Perfect for undergraduate and graduate students in literary studies programs with an African focus, *A Companion to African Literatures* will also earn a place in the libraries of teachers, researchers and professors who wish to strengthen their background in the study of African literatures.

***Invisible Labour in Modern Science*** Jenny Bangham, Xan Chacko, Judith Kaplan, 2022-09-01. *Invisible Labour in Modern Science* is about the people who are concealed, eclipsed or anonymised in accounts of scientific research. Many scientific workers including translators, activists, archivists, technicians, curators and ethics review boards are absent in publications and omitted from stories of discovery. Scientific reports are often held to ideals of transparency yet they are the result of careful judgments about what and what not to reveal. Professional scientists are often celebrated yet they are expected to uphold principles of objective self-denial. The emerging and leading scholars writing in this book negotiate such silences and omissions to reveal how invisibilities have shaped twentieth and twenty-first century science. Invisibility can be unjust; it can also be powerful. What is invisible to whom and when does this matter? How do power structures built on hierarchies of race, gender, class and nation frame what can be seen? And for those observing science: When does the recovery of the invisible serve social justice and when does it invade privacy? Tackling head-on the silences and dilemmas that can haunt historians, this book transforms invisibility into a guide for exploring the moral sensibilities and politics of science and its history.

### **Investigating the Stanford Prison**

**Experiment** Thibault Le Texier, 2024-08-08 In 1971 psychologist Philip Zimbardo ran the now famous Stanford prison experiment to show that prison could make normal people behave in pathological ways Based on the first thorough investigation in the archives of the experiment and on interviews with about half of its participants this book shows that the Stanford prison experiment is far from being scientific In particular the guards knew what results were expected from them they were trained and supervised by the experimenters and they were following a schedule and a set of rules written by the experimenters The experimenters deceived the guards and made them believe they were not subjects They also borrowed many elements from a previous student experiment without disclosing this information in their reports The prisoners were not allowed to leave the experiment at will and they were conditioned by the experimenters The mock prison situation was unrealistic Most participants did not forget they were participating in an experiment and many responded to demand characteristics The data was not collected properly And the conclusions were pre written according to non academic aims This book goes beyond the experiment to provide ample background and context in order to understand how the experiment was planned financed recorded and divulged in the press and within the academic It discusses also the role played by Philip Zimbardo in the trial of one of the guards of Abu Ghraib as well as the impact of mass media on science the debates between personal psychology and social psychology and the specific nature of cold war social science

**Prison Food** An-Sofie Vanhouche,2022-06-11 Based on the lived experiences of incarcerated persons and staff this book explores the symbolic significance of prison foodways to normalization autonomy identity construction power group formation and security The book also traces the rationalization s that policy makers attach to prison food from the water and bread diet of the 18th century the contested abolition of alcohol consumption to the current fear surrounding the spread of COVID 19 through food distribution in prisons The argument is developed that prison food policies have always reflected how Belgian governments have treated imprisoned persons The emphasis on Belgian prisons and the discussions on prison foodways situated on a micro and macro level add a unique flavour to prison food scholarship by providing a deeper understanding of a penal culture outside the dominant tradition of Anglo Saxon and Nordic

studies. Consequently, the book provides a nuanced conception of prison foodways for penologists, sociologists, those with interests in wider prison policy, and those working on the socio-cultural role of food in closed environments.
