Little,Siri T. Hettige,2014-05-23 Since the late 1970s Sri Lanka has undergone a socio economic transformation from protectionism towards economic liberalisation and increasing integration into the world economy Through a systematic comparison of these periods of economic change 1956 1977 and 1977 to the present Angela W Little and Siri T Hettige examine the impact of this transformation on education youth employment and equality of opportunity in Sri Lanka The book charts Sri Lanka s shift from a predominantly agricultural economy to one dominated by services and manufacturing a reduction in unemployment rising educational and occupational levels expectations and achievements and a reduction in poverty In turn it reveals a growing role for the private sector and foreign interests in post secondary education and a modest growth in private education at the primary and secondary levels as well as widening social disparities in access to qualifications training and skills The Sri Lankan experience of and engagement with globalisation has been tempered by a long running ethnic conflict

that hindered economic and social development and diverted considerable public funds into defence and war. Now that the war is won, the challenge is how to invest in human resource development and the fulfilment of the expectations of youth from all ethnic and social groups. This challenge requires serious policy analysis, the generation of more state revenues, the reallocation of existing public resources and a political commitment to the winning of a sustainable peace and stability. This book makes an important contribution to the broader international literature on the implications of globalisation for education policy and practice and to the interaction of exogenous and endogenous forces for educational change. It deals with the tension between the high social demand for education and the growing demand for specialised skills in a changing economy. As such, it has a wide interdisciplinary appeal across education policy and politics, Asian education, South Asian society, youth policy, sociology of education, political economy of social change and globalisation. *Administration Report of the Commissioner of Prisons Sri Lanka*. Prisons Dept, 1972. 'Feminization' of Teaching Profession in Sri Lanka. Upali Sedere, 2011-07. Scientific Essay from the year 2011 in the subject Pedagogy. The Teacher Educational Leadership language English abstract. Krieg 2005 in his review of impact of teacher gender on student gender states that while a large body of research focuses on the gender of students, less research explores the impacts of a teacher's gender on students. Hopf Hatzichristou 1999. Evidence suggests that male teachers tend to be more authoritative, whereas female teachers tend to be more supportive and expressive. Meece 1987. A survey of 20 teachers indicates that male teachers are likely to select a more aggressive disciplinary approach toward boys, while teachers of either gender tended to ignore boys' disruptive behavior more than that of girls when the behavior was not aggressive. Rodriguez 2002. Krieg 2005 further reveals that researchers have found that teachers interact differently with students of similar gender than they do with students of opposite gender. Einarsson C Granström K 2002. This includes evidence suggesting disciplinary procedures and proclivity to discipline vary by both student and teacher gender. Likewise, a teacher's perception of student characteristics and abilities appear to systematically vary by gender. Other studies find male students benefit at the expense of female students in the amount and quality of interaction received from teachers of both genders. What has yet to be determined is how these differences in discipline perceptions of student ability and interactions between student and teacher influence student outcomes as measured by standardized exams.
