

A Visual Guide To Solving A Rubik's Cube

Notation

Sides

Moves

- Bright green represents *bad* moves in the current step, but not the correct solution.

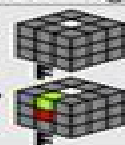

Example:

Goal

Cross on U
Represent matching on sides
Represent in correct spots

Starting Position & Algorithms

This can easily be accomplished logically, just concentrate on getting the correct *representation* pieces.
If you get a piece in the right spot, but the wrong orientation, just use the algorithm.

$F' U L' U'$

End Result

100% done

Starting top-center to match quickly search for the corner pieces with the same color as the cross (I like the cross to be white as you can refer to the corner pieces as Italy, Mexico, The Netherlands, and Ireland). If you know your national flag(s)

The white (for explanations, white) can be in three places:
- Represent (but not matching) to corner of U
- Bottom-center of the sides (closest to cross)

- Knock it out of this position with a simple move like $R' D R$ to get to "U"
- Knock it out of this position with a simple move like $R' D R$ to get to "U"
- If on left side of cube, place on L where F and B are the associated colors. If on right side of cube, place on R where F and L are the associated colors.

...if on left: $R' D R$
...if on right: $L D' L'$

Top-center matching on sides

Place top-center to solve in upper right corner of F

Flip the cube up/down

Middle layer all matching

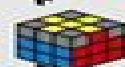

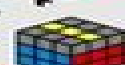

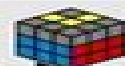

Use either algorithm to randomize squares to find starting position

Cross on U
Any three representations matching

Complete algorithm to get to starting position

Rotate U' until two representations match

All representations matching on sides

$R' D R D'$ repeat until successful

$U R U' R' U' F' U F$

$U' L' U L U F U' F'$

This is a shortcut that flips two opposing middle-edge pieces on the same face, *not required*

$F F U F F U U F F$

$F R U R' U' F'$ and repeat for

$F R U R' U' F'$ then rotate U' to get...

$R U R' U R U U R'$

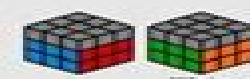

and repeat for

$R U R' U R U U R'$

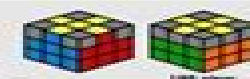

then rotate U' to line up the representations

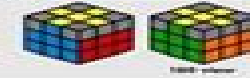

100% done

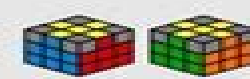

100% done

100% done

100% done

100% done

All representations in correct spots

If no representations are in a correct spot, just do the algorithm from any side.
Repeat for each representation that needs to be corrected

All representations matching

Place top-center to solve in upper right corner of F

Rotate $D M D'$ U' until white square is in correct position (bottom-right of U)
The cube will look messy up but just keep following the algorithm and *Keep Faith*...

Before the Rubik's cube and last movements

$U R U' L' U R' U' L$

$R' D R D'$

always complete the algorithm before rotating U'

$R' D R D'$

always complete the algorithm before rotating U'
