Abstract

1000

- **Long-run demand for physicians:** Long-run demand and short-run demand curves for a group of people depend on the price of the service and the substitutability of the service. Changes in demand will shift the demand curve, but changes in the number of physicians will shift the short-run demand curve. An increase in the number of physicians will shift the short-run demand curve to the right.
- **Short-run supply is inelastic:** The short-run supply curve is inelastic. The short-run supply is inelastic for each year separately. Compared to the long-run supply, the short-run supply is inelastic.
- **Short-run supply is elastic:** In the long-run, the supply is elastic. If there is no limit on the number of people who can become physicians, a small change in the price of the service will cause a large change in the number of physicians. The short-run supply is elastic in the long-run.
