also covers the Agreements on Customs Valuation Preshipment Inspection and Rules of Origin The format allows the reader quick and easy access and reference both with respect to provisions which would otherwise require the parsing of innumerable documents and with respect to provisions hitherto neglected Written by distinguished practitioners and scholars the volume is an indispensable reference work for everyone working on or interested in international trade trade practitioners diplomats scholars and activists alike

Rethinking the World Trade Order Mohammad F. A. Nsour, 2010

Regional Trade Agreements RTAs have proliferated at an unprecedented pace since the creation of the World Trade Organization WTO Although the WTO legally recognizes countries entitlement to form RTAs neither the WTO nor parties to RTAs have an unequivocal understanding of the relationship between the WTO and RTAs In other words the legal controversies the result of uncertainty regarding the application of the WTO GATT laws risk undermining the objectives of the multilateral trade system This research tackles a phenomenon that is widely believed to be heavily economic and political It highlights the economic and political aspects of regionalism but largely concentrates on the legal dimension of regionalism The main argument of the book is that the first step to achieving harmony between multilateralism and regionalism is the identification of the legal uncertainties that regionalism produces when countries form RTAs without taking into account the substantive and procedural aspect of the applicable WTO GATT laws The book calls for the creation of a legal instrument i e agreement on RTAs that combines all of the applicable law on RTAs and simultaneously clarifies the legal language used therein Likewise the WTO should have a proactive role not merely as a coordinator of RTAs but as a watchdog for the multilateral system that has the power to prosecute violating RTAs The author is aware that political concerns are top priorities for governments and policy makers when dealing with the regionalism problematic Hence legal solutions or proposals are not sufficient to create a better international trade system without the good will of the WTO Members who are in fact the players who are striving to craft more regional trade arrangements

Regional Economic Integration and Dispute Settlement in East Asia Anna G Tevini, 2018-06-28 The accession of the People's Republic of China to the World Trade Organization WTO in 2001 significantly transformed the global economy both de facto and de jure At the regional level China's WTO accession served as an important catalyst for the establishment of Regional Trade Agreements RTAs in East Asia This was a novel development for the region since East Asian States had previously followed a largely informal market driven approach to regional economic integration By contrast rules based economic integration involving East Asian States was traditionally limited to multilateral integration under the GATT WTO framework This book

systematically analyses and explains the development nature and challenges of rules based regional economic integration in East Asia with particular attention to the region's first four RTAs. While also addressing the socio-economic, historical and political factors influencing the development of RTAs in East Asia, the book focuses on the legal institutions governing economic integration in the Association of Southeast Asian Nations (ASEAN) as well as under the ASEAN-China Comprehensive Economic Co-Operation Agreement (ACFTA), the Japan-Singapore New Age Economic Partnership Agreement (JSEPA) and the Mainland China-Hong Kong Closer Economic Partnership Arrangement (CEPA). The book provides a systematic comparative account of the scope, depth and hard law versus soft law quality of rules based economic integration achieved under these four RTAs in the areas of trade in goods and services, investment liberalisation and protection, labour mobility and dispute settlement.
