CODES OF SURVIVAL Lloyd Godman, 2023-04-17 Please note This ebook has been specifically designed as an epublication and is optimized for viewing on Thorium Reader. Thorium Reader is the free EPUB reader of choice for Windows 10 and 11, MacOS and Linux. <https://www.edrlab.org/software/thorium-reader/> If you are using a Mac, you may need to download it as a PDF and view it in Chrome. In 1984, Lloyd Godman conceived the idea of taking an expedition of artists to the remote Auckland Island, 465 kilometres south of New Zealand, experience the wild environment, create a series of works that would tour New Zealand as a series of exhibitions. While these remote protected islands are most often the domain of scientists, Godman argued that artists are scientists; their research is on an aesthetic and conceptual level. Beset with many problems and political brick walls, the project took years to materialize, but with perseverance, in 1989 eleven artists visited the Islands in a ground-breaking and highly successful project titled Arts to the Subantarctic. Including Bill Hammond and Laurence Aberhart's Works created by the 11 selected artists were curated into an exhibition that toured art galleries and museums throughout New Zealand for over 2 years. The project was also the first time a woman sailed on a New Zealand Naval vessel. Codes of Survival is Godman's personal response and contribution to the project and his first series of work with Photograms. He incorporated sophisticated combination black and white photograph photograms to create unique photographic works. The project cumulated with an accompanying installation with a sound scape by Peter Adams and a series of short stories that related to events on the Subantarctic Islands. It was a watershed event where Godman moved to camera-less photography with projects like Adze to Coda, Evidence from the Religion of Technology, Aporian Emulsions and acted as a catalyst for his interest in photosensitivity that led to his current living art works with plants.

The Lens NK Guy, 2012-10-08 Which lens should I buy for my camera? It's such a simple question, but choosing the right lens or lenses is actually one of the most important photographic decisions you can make. Nothing affects the quality of a photo more than the lens. It's no longer just about the megapixels; it's the glass that makes all the difference. Many first-time buyers of DSLRs don't venture past the basic lens included in the box. While some are reluctant to spend more money, others are confused by all the buzzwords or are overwhelmed by all the choices out there. It's really a shame because interchangeable lenses give you amazing scope for quality photography. Take in vast sweeping scenes with a wide-angle lens. Capture faraway birds with a telephoto lens. Examine the tiniest detail of a flower with a macro lens. Record the perfect portrait with a prime lens. Anything is possible when you choose the right lens for the job. This book isn't a simple catalogue of available lenses. New products are coming out all the time, and comparing specific lenses can be difficult. Instead, author N

K Guy gives you all the information you need to make smart buying decisions Optical technology is demystified arcane terminology is decoded and practical tips are provided The Lens will help you build the perfect lens collection to suit your needs now and in the future *David Busch's Sony Alpha a7R IV Guide to Digital Photography* David D.
