*Error and Inference* Deborah G. Mayo, Aris Spanos, 2011 Explores the nature of error and inference drawing on exchanges on experimental reasoning reliability and the objectivity of science      **Taking Religion Seriously Across the Curriculum** Warren A. Nord, Charles C. Haynes, 1998-08-15 The authors chart a middle course in our war over religion and public education one that builds on a developing national consensus among educational and religious leaders While it is not proper for schools to practice religion or proselytize neither is it permissible to make them religion free zones Schools do not take religion seriously as the authors review of textbooks and the new national content standards makes clear In Part One they outline the civic constitutional and educational frameworks that should shape the treatment of religion in the curriculum and classroom In Part Two they explore major issues relating to religion in different domains of the curriculum in elementary education and in middle and high school courses in history civics economics literature and the sciences They also discuss Bible courses and world religions courses and explore the relationship of religion to moral education and sex education Note This product listing is for the Adobe Acrobat PDF version of the book      **Jurisdictional Disputes in the Motion-picture Industry: Hearings held at Washington, D.C., Feb. 25-27, Mar. 1-5, 9-12, 16, 17, 1948** United States. Scientific Explanation Philip Kitcher, Wesley C. Salmon, 1962-05-25 Scientific Explanation was first published in 1962 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions Is a new consensus emerging in the philosophy of science The nine distinguished contributors to this volume apply that question to the realm of scientific explanation and although their conclusions vary they agree in one respect there definitely was an old consensus Co editor Wesley Salmon s opening essay Four Decades of Scientific Explanation grounds the entire discussion His point of departure is the founding document of the old consensus a 1948 paper by Carl G Hempel and Paul Oppenheim *Studies in the Logic of Explanation* that set forth with remarkable clarity a mode of argument that came to be known as the deductive nomological model This approach holding that explanation does not move beyond the sphere of empirical knowledge remained dominant during the hegemony of logical empiricism from 1950 to 1975 Salmon traces in detail the rise and breakup of the old consensus and examines the degree to which there is if not a new consensus at least a kind of reconciliation on this issue among contemporary philosophers of science and clear agreement that science can indeed tell us why The other contributors in the order of their presentations are Peter Railton Matti Sintonen Paul W Humphreys David Papineau Nancy Cartwright James Woodward

**Jurisdictional Disputes in the Motion-picture Industry** United States. Congress. House. Committee on Education and Labor,1948 **Investigations of Explanatory Strategies in Linguistics** Lukáš Zámečník,2023-07-24 Linguistic theories often suffer from the dilemma that their explanatory power is based on extra linguistic assumptions The book delineates the essence of linguistic theory and linguistic explanation and in doing so proposes a solution to the dilemma Simultaneously the book is one of the first attempts to profile the philosophy of linguistics as a distinct sub discipline of the contemporary philosophy of science **Rethinking Explanation** Johannes Persson,Petri Ylikoski,2007-05-16 This volume is a product of the international research project Theory of Explanation which was funded by the Joint Committee for Nordic Research Councils for the Humanities and the Social Sciences NOS HS The project started in 2001 and operated for a period of three years by organizing a number of workshops on scientific explanation in Norway Iceland Sweden and Finland The workshops included presentations by people involved in the project and by invited guests Both groups are represented in this

volume which brings together some of the papers presented in these meetings The central theme of the research project was scientific explanation but it was approached from many different angles This plurality of approaches is also visible in the present volume The authors share a joint interest in explanation but not the same theoretical or methodological assumptions As a whole this volume shows that although the theory of explanation has been a major industry within philosophy of science there are still both conceptual problems to be solved and fresh philosophical ideas to explore The papers in this volume have been divided into two broad groups Part 1 consists of papers dealing with general issues in the theory of explanation while the papers in Part 2 focus on some more specific problems Part 1 Theory of Explanation      **Proceedings of the**
