Palm of the Rainforest Ikénnà Nn?l?,2020-08-28 I know who I am Kelvin seemed desperate to win his father s approval However Mr Eze not only seemed unwilling to bestow it but hell bent in making life unbearable for his acclaimed son Kelvin thought it would be best to find his true family rather than endure the torture of being the unwanted child He realised that his quest for recognition was unlikely to succeed so he set his eyes on freedom In the meantime Kelvin expected that a good academic performance would change his luck and put him right with Mr Eze or at least boost his confidence in his abilities With all his attention on his studies competing for the best grades against the leading brains in his class especially Christian an indomitable rival he would not let school romance get in the way fo his goal But slowly and steadily Chioma gained his trust and won him over He would have to make a decision between holding on to his moral principle or satisfying his human desire for friendship New Home New Identity Marginalised and decimated the Biafran people were forced to go to war and secede from Nigeria But decades after losing the war and embracing the Nigerian identity they are still not treated as equal citizens in their home country As a new wave of terrorism sweeps the northern parts of the country the Biafran people predominantly Igbo are again decimated as they have been for decades in every crises and this led to renewed discussions about their independence For Biafra the fight for equality was over and their Sovereignty was not negotiable For Kelvin it wasn t very different and so his quest for truth and independence must begin His compulsory holiday in Igbo land would expose him to the truth that might have indirectly caused him to abandon his academic pursuit Perhaps it was just an excuse to free himself from the clutch of Mr Eze and begin his quest for the truth about his identity *Essays on Language in Societal Transformation* Tunde Opeibi,Josef Schmied,Tope Omoniyi,Kofo Adediji,2015-01-30 This paper generally lends support to the arguments advanced by Awonusi 1989 1990 2004 and others in favour of an endonormative as opposed to an exonormative standard for English pronunciation in Nigeria They include the fact that the existing exonormative standard British Received Pronunciation RP has undergone and is still undergoing changes in its homeland and is not homogeneous The heightened social mobility of today s world perhaps works against the demarcation and homogenization of language varieties and this is all the more true of the varieties or lects that have been proposed for Nigerian English when these are related more or less explicitly to educational attainment Major attention is given in the paper to a schema of basilect mesolect and acrolect presented by Ugorji 2010 with a focus on his account of vowels and his presentation of a mechanism derived from optimality theory for evaluating vowels in contention The basilect and the mesolect are found to be so close to each other that they might be combined There would then be just two varieties In contrast the acrolect is close to British RP albeit with many variants due to the conflict of two standardising forces i e British RP and the basilect mesolect The vowel system of an officially adopted endonormative standard Nigerian RP would mainly be the same as that of British RP but the optimality mechanism could be employed to give preference to some of the Nigerian variants for inclusion in it **New**
