Weapons of Mass Instruction John Taylor Gatto, 2010 Argues that compulsory education is a detriment to developing critical thinking skills and trains students to become subservient to the government

Ethnicity, Inc. John L. Comaroff, Jean Comaroff, 2009-09-15 In *Ethnicity Inc* anthropologists John L and Jean Comaroff analyze a new moment in the history of human identity its rampant commodification Through a wide ranging exploration of the changing relationship between culture and the market they address a pressing question Wherein lies the future of ethnicity Their account begins in South Africa with the incorporation of an ethno business in venture capital by a group of traditional African chiefs But their horizons are global Native American casinos Scotland s efforts to brand itself a Zulu ethno theme park named Shakaland a world religion declared to be intellectual property a chiefdom made into a global business by means of its platinum holdings San Bushmen with patent rights potentially worth millions of dollars nations acting as commercial enterprises and the rapid growth of marketing firms that target specific ethnic populations are just some of the diverse examples that fall under the Comaroffs incisive scrutiny These phenomena range from the disturbing through the intriguing to the absurd Through them the Comaroffs trace the contradictory effects of neoliberalism as it transforms identities and social being across the globe *Ethnicity Inc* is a penetrating account of the ways in which ethnic populations are remaking themselves in the image of the corporation while corporations coopt ethnic practices to open up new markets and regimes of consumption Intellectually rigorous but leavened with wit this is a powerful highly original portrayal of a new world being born in a tectonic collision of culture capitalism and identity

Web As Corpus Maristella Gatto, 2014-02-13 Is the internet a suitable linguistic corpus How can we use it in corpus techniques What are the special properties that we need to be aware of This book answers those questions The Web is an exponentially increasing source of language and corpus linguistics data From gigantic static information resources to user generated Web 2 0 content the breadth and depth of information available is breathtaking and bewildering This book explores the theory and practice of the web as corpus It looks at the most common tools and methods used and features a plethora of examples based on the author s own teaching experience This book also bridges the gap between studies in computational linguistics which emphasize technical aspects and studies in corpus linguistics which focus on the implications for language theory and use

Confronting the Yugoslav Controversies Charles W. Ingrao, Thomas Allan Emmert, 2009 This book will present the findings of an international research initiative of over 160 leading historians social scientists and jurists that will bring together in one volume key evidence presented by all sides in the recent Yugoslav conflicts It represents a direct assault on the proprietary interpretations that nationalist politicians and media have impressed on mass culture in each of the entities of the former Yugoslavia Given gaps in the historical record and the existence of sometimes contradictory evidence the volume will not pretend to resolve all of the outstanding issues that divide the peoples of the former Yugoslavia Yet a combination of original research the validation of existing evidence and the

exposure of widely held bogus myths that anchor public perceptions should narrow considerably the parameters within which opposing sides can still engage in reasoned debate Such a broadly conceived synthesis will provide scholars public officials and media with an indispensable vehicle for challenging and in the most egregious cases dispelling altogether widely held myths that inform popular attitudes The volume's credibility will be based not only on the indisputable scientific credentials of its investigators but on the transparent impartiality of its methodology in soliciting and examining evidence presented by all sides then jointly evaluating and in validating the documentary material through the application of universal scientific methodologies

Official Gazette of the United States Patent and Trademark Office ,2006 **Into the Void** James D. Kiras,Martijn Kitzen,2024-07-15 The moment in the sun for special operations sometimes appears to have passed seemingly eclipsed by preparations for potential conflict under the guise of great power competition combined with failure in Afghanistan Yet the war in Ukraine serves as a reminder that special operations play an even greater role today before during and presumably after conflict The challenge remains dealing with current irregular and hybrid threats at the same time as preparing for an uncertain future as threats and technologies evolve at a dizzying pace Focusing too much on the future of conventional warfare creates a void in national security discussions related to special operations This book seeks to fill that gap drawing on the expertise of scholars and practitioners in the field from the Indo Pacific Europe and the United States to answer what if anything special operations can or should seek to do and how The contributors explore such topics as proxies non state special forces capabilities innovation and transformation artificial intelligence and special operations in space and cyberspace These chapters are united by their analysis that special operations will have future strategic and operational value for allies and adversaries alike provided that difficult choices are made in the present

100 years of mandatory schooling literacy rates have dropped families are fragmented and children are increasingly disaffected This isn't failure it's the system working exactly as designed to produce compliant workers rather than creative thinkers What You'll Discover The hidden curriculum that trains children for industrial compliance instead of critical thinking Step by step strategies for transitioning from school based to self directed learning How to identify and nurture your child's natural learning style and interests Practical methods for creating engaging educational experiences without formal curriculum Real world approaches to developing critical thinking problem solving and life skills Community resources and support networks for families choosing educational alternatives 25 Years of Proven Impact This bestseller has guided over 100 000 families toward educational freedom with children achieving remarkable academic and personal success through self directed learning Zachary Slayback Ivy League dropout and tech entrepreneur provides a powerful new foreword demonstrating how Gatto's principles create innovators and leaders Your child's natural love of learning can't wait for education reform Start implementing these time tested strategies immediately to unlock their intellectual potential and creativity Join thousands of families discovering that education works best when it honors children's innate curiosity

Brain-powered Science Thomas O'Brien, 2010 How can a long metal needle pass through a balloon without popping it How can water flow at very different rates through two identical funnels How can a stick placed on a table under several sheets of newspaper and extended over the edge of a table snap when quickly struck without lifting or tearing the paper Author Thomas O'Brien takes these and 30 more science inquiry activities to a higher level in this book for educators who love to surprise and challenge their students with unanticipated results Using experiments based on the science of a discrepant event an experiment or demonstration in which the outcome is not what students expect O'Brien shows how learners can be motivated to reconsider their preconceived notions and think more closely about what has actually occurred and the underlying scientific explanations What makes this volume more valuable than a mere activity book is the addition of a science education component to the extensive science content found in each activity Each discrepant event is shown to be analogous to a pedagogical principle Speaking directly to teachers O'Brien writes Your participation as teacher as learner experimenter rather than simply passive reader in these minds on activities will lead you to question and help you to revise your implicit assumptions about the nature of science teaching and learning At the same time you will develop expertise with activities that you can use with your own students The dual purpose activities thus allow you to unlock two doors with one key the doors to your own learning and to your students learning The detailed analogies between the activities and science learning make the book an ideal resource for middle and high school teachers science teacher educators and their preservice students and professional development specialists alike This thorough and thought provoking text includes more than 200 up to date internet resources as well as extensions to each of the physical science biology and chemistry activities bringing the total number of inquiry activities to nearly 120 Most important the author reminds teachers that the study of science is full of

surprises and should be both meaningful and fun for students **Learning Objects** Keith Harman,Alex Koohang,2007

Histories of Political Public Relations Anastasios Theofilou,Martina Topić,2025-02-04 Despite strong arguments that have been exploring the influence of Public Relations PR on public information propaganda the development of nation branding and policy making there remains little research on the history of governmental PR This has led to a limited understanding of the discipline that aligns it with a supportive role to wider marketing campaigns or with a stretch to political communication through lobbying Responding to this challenge this book explores PR s historical connection to government communication The editors assemble respected contributors to explore government PR through a series of micro histories and also examine larger theoretical issues including the relationship between PR and propaganda The chapters explore behavioural aspects of government campaigning and the tools and techniques typically used In the context of COVID 19 and global resistance to measures while health and climate scientists warn that there might be more pandemics to come looking at behavioural campaigning becomes even more relevant This book will add knowledge and understanding to the fields of PR history and historiography Academics and researchers will find the volume appropriate for research and teaching

AIDS, Opium, Diamonds, and Empire Nancy Turner Banks,2010-05 It is a mistake to think that wars only concern armies involved in active engagement Nothing is farther from the truth The real forces of evil wage a financial war The dark princes of debt finance have gained leverage over every important social economic and political institution including the health care delivery system In *AIDS Opium Diamonds and Empire* author Nancy Turner Banks draws the connections between free market strategies the destruction of national sovereignty by the process of globalization and AIDS as one of the health consequences of a neo Darwinian philosophy Through meticulous research Banks found a medicalpharmaceutical industrial complex that was taken over one hundred years ago by the titans of financial capitalism Their aim was to create profit not to conquer disease This book of social history points to a cauldron of historical events that contributed to the HIV AIDS crisis *AIDS Opium Diamonds and Empire* tells the dramatic story of a financial ideology that is damaging to everything that it means to be human It is the story of profits over people In the end it is the story of hope and how we can regain our sanity and our health in a world gone mad **Handbook of Research on Learning Design and Learning Objects: Issues,**
