Farming Communities in the Western Alps, 1500-1914 Robert Dodgshon, 2019-05-24 This monograph explores traditional farming communities in French speaking areas of the western Alps for the period 1500 1914 and how they endured in such an environment despite the many problems and risks which it posed for their subsistence and welfare Using an extensive amount of archival material drawn from the relevant regional archives the book presents a great deal of fresh data Its central theme is how such communities responded to the opportunities and challenges presented by the highly variegated environment of their setting The view taken is that their strategies of exploitation stressed diversity and flexibility mapping the highly varied ecologies and resource opportunities of their setting into these strategies by spreading livelihood and risk as widely as possible This interpretative framework is developed across all the book s themes landholding arable and livestock sectors use of the commons and finally how communities coped with climate based risks The book appeals to geographers historians environmental scientists and everyone interested in traditional farming communities and their long term challenges

Water Sustainability J.A.A. Jones, 2014-04-08 Using the latest mapping techniques J A A Jones Chair of the IGU Commission for Water Sustainability examines water availability the impact of climate change and the problems created for water management worldwide as well as possible solutions Water Sustainability A Global Perspective is one of the first textbook to meld the physical and human aspects affecting the world s water resources Part One outlines the challenges and investigates the human factors population growth urbanization and pollution the commercialization of water including globalization and privatization and the impacts of war terrorism and the credit crunch Part Two examines the physical aspects the restless water cycle the impact of past and future climate change and the problems change and unreliability create for water management Part Three discusses current and future solutions including improved efficiency and water treatment systems desalination weather modification and rainwater harvesting and improved legal and administrative frameworks Jones concludes by asking how far technical and financial innovations can overcome the limitations of climatic resources and examining the human and environmental costs involved in such developments This book is the ideal text for any student of water sustainability whether approaching the subject from the point of view of international relations geography or environmental management

Remote Sensing in Hydrology and Water Management Gert A. Schultz, Edwin T. Engman, 2012-12-06 The authors of this book have been approached by consulting engineers You know about remote sensing and thus you can obtain hydrological information where no data exist even without ground measurements so that I can design the required capacity of a drinking water supply reservoir in a developing country On the other hand the authors have been told Remote sensing is not of much use since it is still impossible to estimate ground water resources or surface water flows from remote sensing data The major aim of this book is to correct such unjustified illusions as well as exaggerated criticism by providing the reader with sound information on the potential and the limitations of remote sensing in the field of hydrology and water management The book is meant to be a reference and text it is not a collection of papers

from some meeting The book is intended to provide methods to help the readers solve their own problems in hydrology and water management Therefore scientific issues are presented only as far as they are necessary for the application of remote sensing The reader will see that in some fields e g evapotranspiration soil moisture hydrological modeling the scientific development is still on the way while in others operational techniques are already available e g snow melt run off model land use classification and detection of land use changes flood fore casting and control **Flying Magazine** ,1962-07 **Punch** ,1992
