Advances in Human Aspects of Transportation: Part I Neville Stanton,Giuseppe Di Bucchianico,Andrea Vallicelli,Steven Landry,2021-07-19 Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation awareness skill development and training warnings and workload This book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system

Lake Hydrology William LeRoy Evans III,2021-06-03 The first book dedicated to describing the hydrology of water flow in lake systems geared for limnologists and students of hydrology With fresh water becoming a critical issue around the world lake mass balance the hydrology or water movement in lakes is increasingly important to environmental studies and remediation projects Unfortunately lake hydrology is often only briefly covered in broader texts on hydrogeology and hydrology or is confined to specialized research papers Lake Hydrology rigorously describes the hydrology of flow into and out of lake systems Explaining the physical parameters

that influence lake behavior as well as the mathematics that describes these systems this in depth book fills an important niche in the literature of watershed science This text describes the physical structure and nature of drainage basins and explains the origin and classification of lakes explores the hydrology of lake mass balance and storage as it pertains to lake stage groundwater and lake bottom interaction hypsometry lake hydraulics precipitation surface flow evaporation and transpiration provides models practical information and solutions for lake management or remediation planning utilizing basic data including stage fluctuation evapotranspiration lake bottom seepage precipitation and surface flow uses examples from real world long term studies including Utah s Great Salt Lake and Florida s Lake Jackson a karstic lake system examines the effect of storm events including the temporal and areal distribution of rainfall and flow paths of water in the catchment from precipitation includes an introduction to relevant scientific principles such as dimensional analysis the properties of water and the hydrologic cycle Unlike most limnology texts which emphasize lake ecology and biology Lake Hydrology is designed to truly elucidate the hydrology of lake systems especially as it relates to components of the hydrologic cycle This book will greatly benefit professionals and researchers involved in lake management remediation or investigation of lake systems and can be used as is or integrated within graduate and advanced undergraduate courses in limnology

Guidelines for Evaluating and Selecting Modifications to Existing Roadway Drainage Infrastructure to Improve Water Quality in Ultra-urban Areas, 2012 At head of title National Cooperative Highway Research Program **Globalized Poverty and Environment** Nathaniel O. Agola, Joseph L. Awange, 2014-07-08 This book reviews the key conceptions and economic theories of poverty explains poverty environment nexus and finally offers innovative socio economic and scientific geospatial solutions for the 21st Century The book makes it possible for our readers to understand poverty thorough a concise review of the major theoretical economic frameworks measures of poverty and points out the need to understand rural urban dichotomy of poverty We find the theories and measures to be less than perfect and therefore point out the need to treat these measures and theories as convenient tools lacking perfect accuracy and utmost scientific reliability It follows then that the supposedly knowledgeably crafted poverty reduction and environmental preservation solutions are inherently imperfect The economic solutions proposed in this book transcend extant humdrum macroeconomic and policy measures targeting poverty and environmental issues We point to a new paradigm in which private sector and other stakeholders can create new and inclusive markets where value is co created and shared Above all this book offers timely state of the art geospatial solutions targeting the most pressing global problems of water e g the use of the Gravity Recovery and Climate Experiment GRACE missions to estimate changes in stored water in the water poverty environment nexus pollution agriculture and disaster management where geospatial techniques are applied under strong environmental impact assessment regulatory regimes This book provides a good summary of economic theories of poverty as well as a vivid depiction of the state of environmental degradation in the world People often work separately on different issues that are in fact closely intertwined

The principle of holism is that the whole is greater than the sum of its parts and I believe that this joint venture of two experts on poverty and environment has produced something more than a sum of two separate monographs on the issues. Various points raised in this volume are worth heeding when we think of formulation and implementation of a truly effective post MDGs development agenda. Yoichi Mine, Professor of Human Security and African Area Study, Graduate School of Global Studies, Doshisha University, Japan. **Industrial Laboratories**, 1954-07. **Coastal Extension of CMEMS Products. Models, Data and Applications**. Agustin Sanchez-Arcilla, Joanna Staneva, Manuel Espino Infantes, Enrique Alvarez Fanjul, 2022-05-06. *Kama Muta*. Alan Page Fiske, 2019-11-26. This book describes a ubiquitous and potent emotion that has only rarely and recently been studied in any systematic manner. The words that come closest to denoting it in English are being moved or touched, having a heart warming feeling, feeling nostalgic, feeling patriotic, or pride in family or team. In religious contexts when the emotion is intense it may be labeled ecstasy, mystical rapture, burning in the bosom, or being touched by the Spirit. All of these are instances of what scientists now call kama muta. Sanskrit: moved by love. Alan Page Fiske shows that what evokes this emotion is the sudden creation, intensification, renewal, repair, or recall of a communal sharing relationship when love ignites or people feel newly connected. He explains the social, psychological, cultural, and likely evolutionary processes involved and how they interlock. Kama muta is described as it manifests in diverse settings at many points in history across scores of cultures in everyday experiences as well as the peak moments of life. The chapters illuminate the occurrence of kama muta in a range of contexts including religion, oratory, literature, sport, social media, and nature. The book will be of interest to students and scholars from a number of disciplines who are interested in emotion or social relationships.
