**Value, Reality, and Desire** Graham Oddie, 2005-03-10 Value Reality and Desire is an extended argument for a robust realism about value The robust realist affirms the following distinctive theses There are genuine claims about value which are true or false there are facts about value These value facts are mind independent they are not reducible to desires or other mental states or indeed to any non mental facts of a non evaluative kind And these genuine mind independent irreducible value facts are causally efficacious Values quite literally affect us These are not particularly fashionable theses and taken as a whole they go somewhat against the grain of quite a lot of recent work in the metaphysics of value Further against the received view Oddie argues that we can have knowledge of values by experiential acquaintance that there are experiences of value which can be both veridical and appropriately responsive to the values themselves Finally these value experiences are not the products of some exotic and implausible faculty of intuition Rather they are perfectly mundane and familiar mental states namely desires This view explains how values can be intrinsically motivating without falling foul of the widely accepted queerness objection There are of course other objections to each of the realist's claims In showing how and why these objections fail Oddie introduces a wealth of interesting and original insights about issues of wider interest including the nature of properties reduction supervenience and causation The result is a novel and interesting account which illuminates what would otherwise be deeply puzzling features of value and desire and the connections between them

involving autism spectrum disorder to argue that some philosophical problems are best considered in the context of narratives Using the methodology argued for the book gives detailed innovative exegeses of the stories of Job Samson Abraham and Isaac and Mary of Bethany In the context of these stories and against the backdrop of Aquinas s other views Stump presents Aquinas s own theodicy and shows that Aquinas s theodicy gives a powerful explanation for God s allowing suffering She concludes by arguing that this explanation constitutes a consistent and cogent defense for the problem of suffering

**A Web of Fantasies** Patricia B. Salzman-Mitchell, 2005 Drawing on recent scholarship in art film literary theory and gender studies **A Web of Fantasies** examines the complexities symbolism and interactions between gaze and image in Ovid s *Metamorphoses* and forms a gender sensitive perspective It is a feminist study of Ovid s epic which includes many stories about change in which discussions of viewers viewing and imagery strive to illuminate Ovid s constructions of male and female Patricia Salzman Mitchell discusses the text from the perspective of three types of gazes of characters looking of the poet who narrates visually charged stories and of the reader who sees the woven images in the text Arguing against certain theorists who deny the possibility of any feminine vision in a male authored poem the author maintains that the female point of view can be released through the traditional feminine occupation of weaving featuring the woven images of Arachne involved in a weaving contest in which she tried to best the goddess Athena who turned her into a spider and Philomela who had her tongue cut out so had to weave a tapestry depicting her rape and mutilation The book observes that

while feminist models of the gaze can create productive readings of the poem these models are too limited and reductive for such a protean and complex text as *Metamorphoses* This work brings forth the pervasive importance of the act of looking in the poem which will affect future readings of Ovid's epic
