Consent in the Big Data Age Adam J. Andreotta, 2024-12-23 In the big data age providing informed consent online has never been more challenging Countless companies collect and share our personal data through devices apps and websites fuelling a growing data economy and the emergence of surveillance capitalism Few of us have the time to read the associated privacy policies and terms and conditions and thus are often unaware of how our personal data are being used This is a problem as in the last few years large tech companies have abused our personal data As privacy self management through the mechanism of providing online consent has become increasingly difficult some have argued that surveillance capitalism and the data economy more broadly need to be overthrown This book presents a different perspective It departs from the concept of revolutionary change to focus on pragmatic incremental solutions tailored to everyday contexts It scrutinises how consent is currently sought and provided online and offers suggestions about how online consent practices can be improved upon These include the possibility of subjecting consent gathering practices to ethics committees for review the creation of visual based consent agreements and privacy policies to help with transparency and engagement the development of software to protect privacy and the idea of automated consent functionalities that allow users to bypass the task of reading vast amounts of online consent agreements The author suggests that these small scale changes to online consent obtaining

procedures could if successfully implemented provide us with a way of self managing our privacy in a way that avoids a revolutionary dismantling of the data economy In the process readers are encouraged to rethink the very purpose of providing informed consent online Rethinking Informed Consent in the Big Data Age will appeal to researchers in normative ethics applied ethics philosophy of law and the philosophy of AI It will also be of interest to business scholars communication researchers students and those in industry *Rethinking Advertising* Kathleen M. Alexander Laban Hinton, Giorgio Shani, Jeremiah Alberg, 2019-02-19 Long considered a subfield of international relations and political science Peace Studies has solidified its place as an interdisciplinary field in its own right with a canon degree programs journals conferences and courses taught on the subject Internationally renowned centers offering programs on Peace and Conflict Studies can be found on every continent Almost all of the scholars working in the field however are united by an aspiration attaining Peace whether positive or negative The telos of peace however itself remains undefined and elusive notwithstanding the violence committed in its name This edited volume critically interrogates the field of peace studies considering its assumptions teleologies canons influence enmeshments with power structures biases and normative ends We highlight four interrelated tendencies in peace studies hypostasis strong essentializing tendencies teleology its imagined end normativity the set of often utopian and Eurocentric discourses that guide it and enterprise the attempt to undertake large projects often ones of social engineering to attain this end The chapters in this volume reveal these tendencies while offering new paths to escape them Visit <http://www.rethinkingpeacestudies.com> for further details on the Rethinking Peace Studies project *Rethink Yourself: Change Your Thinking (Not Yourself) to Build Your Self-Esteem* Zach Leezer, 2025-01-21 Dramatically improve the way you think about yourself Rethink Yourself offers a fresh perspective on building self esteem by speaking to the mind not the heart The root cause of low self esteem isn't personal deficiencies even if it feels that way low self esteem is a direct result of unfair and unkind self talk To improve your self esteem you don't need to change yourself you just need to change the way you think about yourself And no that doesn't involve lying to yourself it means ensuring your beliefs about yourself are fair and accurate rather than warped by harsh self criticism Authoritative and insightful Rethink Yourself is an innovative step by step guide using methods rooted in Cognitive Behavioral Therapy CBT and Dialectical Behavioral Therapy DBT Featuring interactive activities Rethink Yourself is essential reading for anyone struggling with relentless self criticism This book will help you give yourself the credit you deserve without being arrogant change your negative self talk by making it work for you not against you evaluate your personal qualities fairly and accurately know and honor your innate worth uncover positive traits you didn't even realize you had take your mistakes in stride communicate with confidence and so much more Building your self esteem isn't about feeling inspired to somehow uncover your hidden confidence and it's certainly more nuanced than just looking in the mirror and telling yourself you're awesome It's about changing those deeply held beliefs about yourself that keep you from accepting yourself as you are Are you ready to finally start feeling good about yourself *Rethinking Strategy for Creative Industries* Milan Todorovic, with Ali Bakir, 2016-03-02 Creative Industry practices are increasingly manifested through hybrid models and methods and emerging sub sectors With ever finer dividing lines between form and content product and service participation and consumption the distinctions between sectors are increasingly blurred while new convergent models emerge Reflecting this fluid context this book provides a new perspective on strategy in the Creative Industries Based on extensive original research and live

empirical data derived from case studies interviews and observations with creative managers it reveals strategic decision making by analysing business manoeuvres and stages of innovation in the Creative Industries Through analysing the interactive features of aesthetically driven information assets and how new user consumer cultures are applied it uncovers the principles that are transforming strategy in the Creative Industries This innovative volume will be of significant interest to scholars advanced students and practitioners in the Creative Industries as well as well as industry consultancies and practitioners Rethinking Youth Citizenship After the Age of Entitlement Lucas Walsh,Rosalyn Black,2018-03-22

Rethinking Youth Citizenship After the Age of Entitlement provides a primer for exploring hard questions about how young people understand experience and enact their citizenship in uncertain times and about their senses of membership and belonging It examines how familiar modes of exclusion are compounded by punitive youth policies in ways that are concealed by neoliberal discourses It considers the role of key institutions in constructing young people s citizenship and looks at the ways in which some young people are opting out of established enactments of citizenship while creating new ones Critically reflecting on recent scholarly interest in the geographical relational affective and temporal dimensions of young people s experiences of citizenship it also reinvigorates the discussion about citizenship rights and entitlements and what these might mean for young people The book draws on global research and theories of citizenship but has a particular focus on Australia which provides a unique example of a country that has fared well economically yet is mimicking the austerity measures of the United Kingdom and Europe It concludes with an argument for a rethinking of citizenship which recognises young people s rights as citizens and the ways in which these interact with their lived experience at a time that has been characterised as the end of the age of entitlement **The Crisis of Journalism Reconsidered** Jeffrey C. Alexander,Elizabeth Butler

Breese,María Luengo,2016-06-20 This collection of original essays interrogates the crisis of journalism narrative from a dramatically different perspective Rethinking Stress in an Age of Ease William J. Elenchin,2019-02-27

Stress is a concept that has become both increasingly popularized and misunderstood in society Today we often think about how stressed we are many on a daily basis This is especially interesting when we consider that as life has become easier at least from a materialistic standpoint rates of depression and anxiety in our culture have risen It is true that living with too many demands in life can be harmful to our physical and emotional health But it is equally true that when we believe difficult circumstances are an unnatural part of life we only set ourselves up for increased fear and sorrow Hans Selye the scientist who discovered how stress operates in the mind and body nearly a century ago never intended for it morph into the now common idea that all stress is bad for us Yet that s precisely what has occurred driven by three particular social changes in the last half century This little guide is a back to the basics kind of field manual written for students but is generally for all ages By rethinking the proper role that stress plays in our lives we will be better positioned not only to deal with life s challenges but to embrace all seasons as a part of our journey while on earth **Inside the Middle East** Avi Melamed,2016-03-29 Acclaimed Israeli
