## **Multidisciplinary Perspectives on Team Sports: Contextualizing Training and Competition Demands**

Miguel-Angel Gomez-Ruano, Pierpaolo Sansone, Vincenzo Rago, 2024-12-04 Team sports performance is determined by the complex non linear interaction of several factors including physical and physiological aspects technical tactical constraints mental demands perceptual and emotional aspects and contextual and environmental factors The influence of each of these aspects has been previously investigated However studies have often employed monodimensional perspectives looking at one or only a few different domains concurrently In football and rugby extensive efforts have been produced to contextualize the demands of training and competition based on players characteristics tactical constraints and contextual factors This information facilitates coaches in selecting the most appropriate training and competition strategies based on a number of

different factors including the team and the opponents characteristics technical tactical abilities fitness status and considering contextual factors Differently there is a lack of information on contextualized competition demands in other team sports such as basketball handball futsal and volleyball Furthermore the mental demands and psychological and emotional implications of team sports have received little or monodimensional attention limiting the applicability of findings in real life scenarios where a multitude of factors belonging to different disciplines e g physiology psychology training science social sciences need to be taken into account
