**REPORTS, WITH A SUGGESTED APPROACH TO GEOLOGIC-HAZARD ORDINANCES IN UTAH** Steve D.  
Bowman, William R. Lund, 2016-09-21 The purpose of these guidelines for investigating geologic hazards and preparing  
engineering geology reports is to provide recommendations for appropriate minimum investigative techniques standards and  
report content to ensure adequate geologic site characterization and geologic hazard investigations to protect public safety  
and facilitate risk reduction Such investigations provide important information on site geologic conditions that may affect or  
be affected by development as well as the type and severity of geologic hazards at a site and recommend solutions to mitigate  
the effects and the cost of the hazards both at the time of construction and over the life of the development The  
accompanying suggested approach to geologic hazard ordinances and school site investigation guidelines are intended as an  
aid for land use planning and regulation by local Utah jurisdictions and school districts respectively Geologic hazards that are  
not accounted for in project planning and design often result in additional unforeseen construction and or future  
maintenance costs and possible injury or death      *Report* United States. National Bureau of Standards, 1951      **Hearings,**
