**Digitalization of Society and Socio-political Issues 2** Éric George, 2020-01-08 Digitalization is a long socio historic process in which all areas of society's activities are reconfigured In the first volume of Digitalization of Society and Socio political Issues there is an examination of the transformations linked to the development of digital platforms and social media which affect cultural and communicational industries The book also analyzes the formation of Big Data their algorithmic processing and the societal changes which result from them social monitoring and control in particular Through diverse critical reflections it equally presents different ways that digital participates in relations of power and domination and contributes to eventual emancipatory practices Following on the second volume examines the transformations that are linked to digital practices that affect the production circulation and consumption of information as well as new forms that are taken by social mobilizations It treats several important issues in the digital era that are more likely to become the subject of public debates among which one can include the renewed relationship between research and digital Through diverse critical reflections it equally presents different ways that digital participates in relations of power and domination and contributes to eventual emancipatory practices

**Digital Technologies and African Societies** Julien Atchoua, Jean-Jacques Maomra Bogui, Saikou Diallo, 2020-11-17 The integration and use of information and communication technologies ICT in African countries is increasingly observable in various sectors of activity banking education trade etc despite a digital divide still relevant ICT has become a major sector of the recent growth of a new informal economy in African cities Ch neu Loquay 2008 This question has been at the heart of various international meetings An overall positive and even utopian momentum is generally heard about the contribution of digital technologies to the development of African states The adoption or appropriation of digital technologies by Africans is presented in many speeches by politicians or institutions involved in the field of cooperation and international development as an important issue for the development of this continent These different considerations give rise to reflections on the following themes Social Media and Public Space in Africa Challenges of the digital economy in Africa ICT and modernization of higher education in Africa

**Health Research Practices in a Digital Context** Laurent Morillon, 2020-09-30 The current generalized digitization of society is influencing the health environment healthcare organizations as well as actors In this context human and social sciences deconstruct nuance and sometimes even challenge certain preconceived ideas and or dominant discourses In this book researchers of four nationalities and three different disciplines have agreed to open the black box of their work They display their scientific practices from the perspective of epistemology ethics and methodology They present and analyze their values and postulates but also what may have influenced the project the definition of the object and objectives as well as their approaches In a contextual way the first part presents some changes in environments and infocommunicational practices related to digital health The second part opens space to reflect on ethics and deontology Finally postulating that scientific fact is not an

essence but the result of a process the last part discusses the methods implemented which may be different from those initially envisaged This book is dedicated to the researchers and postgraduate students in the human and social sciences as well as the health practitioners likely to collaborate with them     Artificial Intelligence and Digital Diplomacy Fatima Roumate,2021-08-31 This volume discusses digital diplomacy and artificial intelligence within the context of global governance and international security Rapid digitalization has changed the way international actors interact offering new opportunities for international and bilateral cooperation and reinforcing the role of the emergent actors within global governance New phenomena linked to digitalization and artificial intelligence are emerging and this volume brings a multidisciplinary mixed methods approach to studying them Written by globally recognized experts each chapter presents a case study covering an emerging topic such as international regulation of the web and digital diplomacy the interplay of artificial intelligence and cyber diplomacy social media and artificial intelligence as tools for digital diplomacy the malicious use of artificial intelligence cyber security and data sovereignty Incorporating both theory and practice quantitative and qualitative analysis this volume will be of interest to graduate students and researchers in international relations diplomacy security studies and artificial intelligence as well as diplomats and policymakers looking to understand the implications of digitalization and artificial intelligence in their fields     **Social Informatics** Luca Maria Aiello,Daniel
